

Guides team roaster builds

SSJ GOKU (GENERALIST)

Character Identity

Primary Roles

- Neutral Control
- Support
- Generalist

Team Archetypes

- Neutral
- Support
- Balanced
- Control

One-Sentence Summary

- A reliable generalist who strengthens almost any team through stable neutral, strong assist value, and flexible positioning.
-

What This Character Contributes

Damage

- Above average damage.
- Converts common hits consistently.
- Reliable rather than explosive.

Neutral

- Strong ki blasts.
- Excellent beam control.
- Simple, effective fullscreen presence.
- Helps teams establish screen control.

Mix

- Limited solo mix.

- Relies on assists more than dedicated mix characters.
- Creates stable pressure rather than overwhelming offense.

Support

- One of the easiest characters to fit into a team.
- Provides useful assists and DHC routes.
- Rarely creates team-building problems.

Resource Economy

- Moderate meter build.
- Moderate meter usage.
- Functions well without heavy resource investment.

Team Placement

Point

- Viable: Yes
- Benefits from assists behind him.
- Can establish neutral early.

Mid

- Viable: Yes
- Provides strong support while remaining threatening.

Anchor

- Viable: Situational
- Can function solo but lacks the comeback power of dedicated anchors.

Preferred Position

- Mid

Explanation

- SSJ Goku provides maximum value when supporting another point character while still remaining a competent fighter if forced onto the screen.

Assist Analysis

A Assist

Provides

- Fullscreen beam control.
- Neutral coverage.
- Combo extensions.
- Easy confirms.

Best Partners

- Android 18
- Cell
- Adult Gohan

Why

- These characters benefit heavily from beam coverage to start offense.

DHC Synergy

Characters That Love DHCing Into SSJ Goku

- Most of the cast.

Why

- Reliable damage.
- Stable knockdowns.
- Consistent screen positioning.

Characters SSJ Goku Loves DHCing Into

- High damage characters.
- Meter-efficient anchors.

Why

- Allows teams to convert neutral wins into stronger rewards.

Best Team Archetypes

Neutral → Pressure

Why It Works

- SSJ Goku wins space.
- Teammates convert that space into offense.

Example Teams

- SSJ Goku / Adult Gohan / Tien

- SSJ Goku / Android 18 / Yamcha
-

Control → Cashout

Why It Works

- SSJ Goku helps establish neutral control.
- Teammates capitalize on openings.

Example Teams

- SSJ Goku / Broly (DBS) / Base Goku
 - SSJ Goku / Frieza / Tien
-

Win Conditions

Primary Win Condition

- Win neutral repeatedly through stable screen control.

Secondary Win Condition

- Use beam support to enable stronger offensive teammates.

Late-Game Win Condition

- Outplay opponents through consistency rather than explosive comeback mechanics.
-

Team Building Questions

SSJ Goku Wants Teammates Who...

- Have strong pressure.
- Have strong mix.
- Benefit from beam support.

SSJ Goku Struggles To Provide...

- Elite mix.
- Extreme comeback potential.
- Specialized utility.

Before Adding SSJ Goku Ask:

- Does my team need stability?
- Does my team need a beam assist?
- Does my team need stronger neutral?

Summary

Why Pick SSJ Goku?

- Consistency.
- Flexibility.
- Strong neutral support.

Why Avoid SSJ Goku?

- Team already has sufficient neutral.
- Team needs a more specialized character.

Final Verdict

- A dependable generalist that improves team stability and helps answer neutral-focused team-building problems.

GOKU (SUPER SAIYAN BLUE) (Momentum)

Character Identity

Primary Roles

- Rushdown
- Pressure
- Momentum

Team Archetypes

- Rushdown
- Mix
- Aggression
- Pressure

One-Sentence Summary

- A pressure-focused character that excels at turning small openings into relentless offense and forcing opponents to defend repeatedly.

What This Character Contributes

Damage

- Strong meterless damage.

- Excellent corner carry.
- Efficient conversions from common confirms.

Neutral

- Solid but not dominant.
- Relies on movement and pressure rather than controlling space.
- Rewards proactive play.

Mix

- Strong stagger pressure.
- Multiple offensive options.
- Can repeatedly force difficult defensive decisions.

Support

- Less supportive than traditional utility characters.
- Primarily contributes through offensive pressure.

Resource Economy

- Builds meter effectively through extended pressure.
- Functions well without large meter investment.
- Can spend resources to secure momentum.

Team Placement

Point

- Viable: Excellent

Why

- Benefits heavily from assists.
- Generates momentum early.
- Uses team resources efficiently.

Mid

- Viable: Good

Why

- Can capitalize on strong point characters.
- Remains threatening with meter.

Anchor

- Viable: Situational

Why

- Lacks the solo utility of dedicated anchors.
- Performs best with support.

Preferred Position

- Point

Explanation

- Blue Goku gains tremendous value from having assists available and is at his strongest when initiating the team's offense.
-

Assist Analysis

A Assist

Provides

- Neutral coverage.
- Combo extensions.
- Reliable confirms.

Best Partners

- Characters requiring neutral assistance.
- Characters that want easier confirms.

B Assist

Provides

- Pressure support.
- Offensive utility.

Best Partners

- Rushdown teams.
- Mix-focused teams.

C Assist

Provides

- Easy confirms.
- Long-range conversion opportunities.

Drawbacks

- Long cooldown.
-

DHC Synergy

Characters That Love DHCing Into Blue Goku

- Characters seeking corner carry.
- Characters looking to continue pressure.

Why

- Blue Goku maintains offensive momentum exceptionally well.
-

Characters Blue Goku Loves DHCing Into

- High-damage cashout characters.
- Strong anchors.

Why

- Blue Goku creates openings that teammates can convert into kills.
-

Best Team Archetypes

Rushdown → Pressure

Why It Works

- Blue Goku thrives when a team commits fully to offense.

Example Teams

- Blue Goku / Adult Gohan / Tien
 - Blue Goku / Android 18 / Yamcha
-

Mix → Kill

Why It Works

- Blue Goku creates repeated offensive situations.
- Teammates maximize reward from those openings.

Example Teams

- Blue Goku / Kid Buu / Base Goku
 - Blue Goku / Android 21 / Broly (DBS)
-

Win Conditions

Primary Win Condition

- Establish offense and maintain momentum.

Secondary Win Condition

- Force defensive mistakes through repeated pressure sequences.

Late-Game Win Condition

- Continue overwhelming opponents before they can stabilize neutral.
-

Team Building Questions

Blue Goku Wants Teammates Who...

- Provide strong assists.
- Improve pressure.
- Increase conversion opportunities.

Blue Goku Struggles To Provide...

- Elite fullscreen control.
- Defensive utility.
- Anchor stability.

Before Adding Blue Goku Ask:

- Does my team want to play aggressively?
 - Can my team support his offense?
 - Does my team already have enough neutral control?
-

Summary

Why Pick Blue Goku?

- Strong pressure.
- Excellent momentum.
- Consistent offense.

Why Avoid Blue Goku?

- Team requires stronger support utility.
- Team lacks neutral control.

Final Verdict

- A momentum-based point character that rewards aggressive players and teams built around maintaining offensive pressure.

GOKU (BASE)

Character Identity

Primary Roles

- Battery
- Enabler
- Anchor

Team Archetypes

- Resource-Based
- Neutral
- Control
- Support

One-Sentence Summary

- A resource-focused character that rewards teams capable of generating meter and converting strong neutral into devastating late-game situations.
-

What This Character Contributes

Damage

- Exceptional damage with resources.
- One of the strongest meter conversion characters in the game.
- Extremely threatening with limit break and sparking.

Neutral

- Strong grounded neutral.
- Excellent screen presence.
- Effective at forcing opponents to respect movement and ki blast control.

Mix

- Functional but not overwhelming.
- Relies more on strong fundamentals than layered mix.

Support

- One of the best team-oriented characters in the game.
- Spirit Bomb routes create unique team-building opportunities.
- Assists provide strong utility.

Resource Economy

- Builds meter effectively.
 - Converts meter exceptionally well.
 - Rewards teams capable of generating resources consistently.
-

Team Placement

Point

- Viable: Situational

Why

- Can function as a battery.
- Usually better utilized elsewhere.

Mid

- Viable: Excellent

Why

- Gains access to Spirit Bomb synergy.
- Supports point characters effectively.

Anchor

- Viable: Excellent

Why

- Strong solo neutral.
- Exceptional comeback potential.
- Outstanding resource conversion.

Preferred Position

- Mid / Anchor

Explanation

- Base Goku shines when a team is built around enabling his resource conversion and Spirit Bomb utility.
-

Assist Analysis

A Assist

Provides

- Neutral control.
- Screen coverage.
- Combo utility.

Best Partners

- Characters requiring neutral support.
 - Characters with strong mix.
-

B Assist

Provides

- Meter generation.
- Team utility.
- Resource support.

Best Partners

- Meter-hungry characters.
 - High cashout teams.
-

C Assist

Provides

- Easy confirms.
- Long-range conversions.

Drawbacks

- Long cooldown.
-

DHC Synergy

Characters That Love DHCing Into Base Goku

- Spirit Bomb compatible characters.
- High corner carry characters.
- Meter generating characters.

Why

- Spirit Bomb dramatically increases reward on successful openings.
-

Characters Base Goku Loves DHCing Into

- Strong cashout characters.
- Characters with excellent level 1 supers.

Why

- Maximizes team damage efficiency.
-

Special DHC Interactions

Spirit Bomb Synergy

- One of the defining reasons to build around Base Goku.
 - Certain characters gain access to unique routes and kill opportunities through Spirit Bomb setups.
-

Best Team Archetypes

Battery → Cashout

Why It Works

- Team generates resources.
- Base Goku converts them into overwhelming damage.

Example Teams

- Teen Gohan / Adult Gohan / Base Goku
 - Android 18 / Broly (DBS) / Base Goku
-

Control → Spirit Bomb

Why It Works

- Neutral-focused teams create opportunities.
- Base Goku maximizes reward from those opportunities.

Example Teams

- Frieza / Zamasu / Base Goku
- SSJ Goku / Cell / Base Goku

Win Conditions

Primary Win Condition

- Generate resources and convert hits into overwhelming damage.

Secondary Win Condition

- Utilize Spirit Bomb synergy to secure kills.

Late-Game Win Condition

- Leverage limit break, sparking, and meter advantage to dominate solo situations.
-

Team Building Questions

Base Goku Wants Teammates Who...

- Generate meter.
- Enable Spirit Bomb routes.
- Benefit from strong assists.

Base Goku Struggles To Support...

- Teams with poor meter economy.
- Teams that cannot capitalize on Spirit Bomb utility.

Before Adding Base Goku Ask:

- Can my team generate meter?
 - Can my team use Spirit Bomb setups?
 - Do I need a stronger anchor?
-

Summary

Why Pick Base Goku?

- Exceptional resource conversion.
- Spirit Bomb synergy.
- Strong anchor value.

Why Avoid Base Goku?

- Team cannot support his strengths.
- Spirit Bomb utility is unused.

Final Verdict

- A resource-focused powerhouse whose value increases dramatically when a team is built to support his unique utility.

GOKU (GT)

Character Identity

Primary Roles

- Enabler
- Pressure
- Anchor

Team Archetypes

- Rushdown
- Pressure
- Balanced
- Resource Efficient

One-Sentence Summary

- A highly efficient character that provides strong neutral, pressure, and solo threat while demanding very little support from the rest of the team.

What This Character Contributes

Damage

- Strong damage output.
- Excellent corner carry.
- Converts common hits consistently.

Neutral

- Strong air mobility.
- Difficult movement patterns.
- Good screen control.
- Can challenge angles many characters struggle to cover.

Mix

- Strong pressure structure.
- Creates difficult defensive situations.

- Benefits heavily from strong assists.

Support

- Reliable assists.
- Easy integration into many team structures.
- Rarely creates team-building conflicts.

Resource Economy

- Very efficient.
 - Does not require large meter investment.
 - Converts resources effectively when available.
-

Team Placement

Point

- Viable: Good

Why

- Uses assists effectively.
- Builds momentum early.

Mid

- Viable: Excellent

Why

- Flexible role.
- Strong support value.

Anchor

- Viable: Excellent

Why

- Strong solo neutral.
- Strong limit break value.
- Difficult to pin down.

Preferred Position

- Mid / Anchor

Explanation

- GT Goku is valuable because he functions well regardless of game state and team structure.
-

Assist Analysis

A Assist

Provides

- Neutral control.
- Combo extensions.
- Reliable confirms.

Best Partners

- Rushdown characters.
 - Pressure-focused teams.
-

B Assist

Provides

- Utility.
- Team support.

Best Partners

- Characters needing assistance in neutral.
-

C Assist

Provides

- Easy confirms.
- Long-range conversions.

Drawbacks

- Long cooldown.
-

DHC Synergy

Characters That Love DHCing Into GT Goku

- Point characters looking to maintain pressure.
- Characters seeking stable damage conversion.

Why

- GT Goku enters the screen comfortably and maintains momentum.
-

Characters GT Goku Loves DHCing Into

- Cashout characters.
- Strong anchors.

Why

- Maximizes team reward after opening the opponent.
-

Best Team Archetypes

Pressure → Pressure

Why It Works

- GT Goku keeps offensive momentum active.
- Difficult for opponents to stabilize neutral.

Example Teams

- GT Goku / Adult Gohan / Tien
 - GT Goku / Android 18 / Base Goku
-

Balanced Core

Why It Works

- GT Goku fills multiple roles.
- Covers weaknesses without demanding resources.

Example Teams

- GT Goku / SSJ Goku / Yamcha
 - GT Goku / Cell / Base Goku
-

Win Conditions

Primary Win Condition

- Consistently win interactions through mobility and efficient offense.

Secondary Win Condition

- Maintain pressure while minimizing resource usage.

Late-Game Win Condition

- Abuse strong solo neutral and limit break scaling to close games.
-

Team Building Questions

GT Goku Wants Teammates Who...

- Benefit from stable support.
- Appreciate flexible team structures.
- Can capitalize on pressure.

GT Goku Struggles To Support...

- Extremely resource-hungry teams.
- Teams needing dedicated utility specialists.

Before Adding GT Goku Ask:

- Does my team need flexibility?
 - Does my team need a stronger anchor?
 - Does my team need more efficient resource usage?
-

Summary

Why Pick GT Goku?

- Flexibility.
- Efficiency.
- Strong solo presence.

Why Avoid GT Goku?

- Team already has similar strengths.
- Team requires a more specialized role.

Final Verdict

- A versatile character that fits comfortably into almost any team while providing consistent value throughout every stage of a match.

GOKU (ULTRA INSTINCT)

Character Identity

Primary Roles

- Neutral
- Anchor
- Self-Sufficient

Team Archetypes

- Neutral
- Control
- Fundamentals
- Reactive

One-Sentence Summary

- A self-sufficient neutral monster that excels at winning interactions without requiring significant team support.
-

What This Character Contributes

Damage

- Solid damage output.
- Consistent conversions.
- Strong reward from common confirms.

Neutral

- Exceptional.
- Controls space effectively.
- Difficult to challenge directly.
- Strong anti-approach tools.

Mix

- Functional but not overwhelming.
- Relies more on winning interactions than forcing mix.

Support

- Offers useful assists.
- Primarily contributes through his own strength rather than enabling teammates.

Resource Economy

- Efficient.
 - Does not require excessive meter.
 - Uses resources effectively when available.
-

Team Placement

Point

- Viable: Good

Why

- Can establish control early.
- Uses assists effectively.

Mid

- Viable: Excellent

Why

- Strong independent character.
- Functions well after team resources are reduced.

Anchor

- Viable: Excellent

Why

- Strong solo neutral.
- Difficult to pressure.
- Excellent comeback potential.

Preferred Position

- Mid / Anchor

Explanation

- UI Goku thrives when he is allowed to leverage his independence and strong neutral game.
-

Assist Analysis

A Assist

Provides

- Neutral support.
- Screen control.
- Combo utility.

Best Partners

- Rushdown characters.
 - Characters needing help approaching.
-

B Assist

Provides

- Utility.
- Combo extensions.

Best Partners

- Technical teams.
 - Conversion-heavy teams.
-

C Assist

Provides

- Easy confirms.
- Fullscreen conversion potential.

Drawbacks

- Long cooldown.
-

DHC Synergy

Characters That Love DHCing Into UI Goku

- Characters wanting safe transitions.
- Characters seeking stable damage conversion.

Why

- UI enters neutral comfortably and can immediately begin controlling space.
-

Characters UI Goku Loves DHCing Into

- High damage cashout characters.

- Resource-efficient anchors.

Why

- Maximizes team reward after winning neutral.
-

Best Team Archetypes

Neutral → Win Condition

Why It Works

- UI consistently wins interactions.
- Team capitalizes on those openings.

Example Teams

- UI Goku / Base Vegeta / Tien
 - UI Goku / Adult Gohan / Base Goku
-

Control → Attrition

Why It Works

- Team slowly gains advantages through superior neutral.
- Difficult for opponents to establish offense.

Example Teams

- UI Goku / Zamasu / Frieza
 - UI Goku / Janemba / Base Goku
-

Win Conditions

Primary Win Condition

- Win neutral repeatedly.

Secondary Win Condition

- Force opponents into unfavorable interactions.

Late-Game Win Condition

- Leverage strong solo tools and limit break to close games.
-

Team Building Questions

UI Goku Wants Teammates Who...

- Capitalize on neutral wins.
- Appreciate stable assists.
- Do not require constant support.

UI Goku Struggles To Provide...

- Elite mix.
- Heavy team utility.
- Dedicated resource generation.

Before Adding UI Goku Ask:

- Does my team need stronger neutral?
 - Does my team need a stronger anchor?
 - Does my team need a more self-sufficient character?
-

Summary

Why Pick UI Goku?

- Exceptional neutral.
- Strong anchor value.
- Self-sufficient.

Why Avoid UI Goku?

- Team needs stronger support.
- Team needs dedicated mix.

Final Verdict

- A neutral-focused powerhouse that provides stability, independence, and reliable performance in almost any team composition.

VEGETA (SUPER SAIYAN)

Character Identity

Primary Roles

- Support
- Neutral
- Mid

Team Archetypes

- Balanced
- Control
- Neutral
- Support

One-Sentence Summary

- A support-oriented character that provides reliable neutral assistance, stable team structure, and flexible positioning.
-

What This Character Contributes

Damage

- Average damage output.
- Consistent conversions.
- Prioritizes reliability over explosive reward.

Neutral

- Strong projectile game.
- Effective air control.
- Helps establish screen presence.

Mix

- Functional pressure.
- Relies on assists for stronger offense.
- Not a dedicated mix character.

Support

- One of his strongest attributes.
- Provides reliable assists and neutral coverage.
- Fits comfortably into many team structures.

Resource Economy

- Efficient.
 - Does not require excessive meter.
 - Uses resources consistently.
-

Team Placement

Point

- Viable: Good

Why

- Uses assists effectively.
- Builds momentum through neutral wins.

Mid

- Viable: Excellent

Why

- Provides strong support value.
- Maintains team stability.

Anchor

- Viable: Situational

Why

- Functional solo.
- Outperformed by dedicated anchors.

Preferred Position

- Mid

Explanation

- SSJ Vegeta gains maximum value when supporting teammates while maintaining his own effectiveness.
-

Assist Analysis

A Assist

Provides

- Neutral coverage.
- Air control.
- Combo extensions.

Best Partners

- Rushdown characters.
- Characters needing approach assistance.

B Assist

Provides

- Utility.
- Pressure support.

Best Partners

- Teams built around maintaining offense.
-

C Assist

Provides

- Easy confirms.
- Fullscreen conversions.

Drawbacks

- Long cooldown.
-

DHC Synergy

Characters That Love DHCing Into SSJ Vegeta

- Characters wanting stable damage.
- Characters seeking safe transitions.

Why

- Vegeta enters comfortably and maintains team momentum.
-

Characters SSJ Vegeta Loves DHCing Into

- Cashout characters.
- Strong anchors.

Why

- Converts neutral wins into stronger rewards.
-

Best Team Archetypes

Neutral → Pressure

Why It Works

- Vegeta helps establish neutral.
- Teammates capitalize on openings.

Example Teams

- SSJ Vegeta / Android 18 / Tien
 - SSJ Vegeta / Adult Gohan / Base Goku
-

Balanced Core

Why It Works

- Covers weaknesses.
- Rarely conflicts with teammates.

Example Teams

- SSJ Vegeta / Cell / Yamcha
 - SSJ Vegeta / Bardock / Base Goku
-

Win Conditions

Primary Win Condition

- Establish neutral advantage repeatedly.

Secondary Win Condition

- Enable stronger teammates through support.

Late-Game Win Condition

- Rely on solid fundamentals and efficient resource usage.
-

Team Building Questions

SSJ Vegeta Wants Teammates Who...

- Benefit from neutral support.
- Capitalize on stable assists.
- Have strong reward on hit.

SSJ Vegeta Struggles To Provide...

- Elite mix.
- Massive damage.
- Dedicated anchor utility.

Before Adding SSJ Vegeta Ask:

- Does my team need support?
 - Does my team need better neutral?
 - Does my team need a stronger mid character?
-

Summary

Why Pick SSJ Vegeta?

- Strong support.
- Reliable neutral.
- Easy team integration.

Why Avoid SSJ Vegeta?

- Team needs a specialist.
- Team requires stronger solo presence.

Final Verdict

- A dependable support character that improves team stability and helps create opportunities for stronger offensive teammates.

VEGETA (SUPER SAIYAN BLUE)

Character Identity

Primary Roles

- Pressure
- Damage
- Point

Team Archetypes

- Rushdown
- Pressure
- Aggression
- Snowball

One-Sentence Summary

- A high-pressure point character that converts momentum into devastating damage and forces opponents to respect every opening.

What This Character Contributes

Damage

- Exceptional damage output.
- Strong meterless reward.
- Outstanding corner damage.
- Converts stray hits into meaningful advantage.

Neutral

- Solid but aggressive.
- Prefers advancing rather than controlling space.
- Excels at turning movement into pressure.

Mix

- Strong offensive options.
- Difficult pressure sequences.
- Threatens both strike and defensive responses.

Support

- Limited compared to dedicated support characters.
- Primarily contributes through offensive presence.

Resource Economy

- Uses meter efficiently.
- Gains tremendous reward from resources.
- Can rapidly snowball successful interactions.

Team Placement

Point

- Viable: Excellent

Why

- Benefits heavily from assists.
- Maximizes pressure potential.
- Creates momentum early.

Mid

- Viable: Good

Why

- Strong damage remains valuable.
- Can capitalize on earlier momentum.

Anchor

- Viable: Situational

Why

- Functional solo.
- Lacks the utility of dedicated anchors.

Preferred Position

- Point

Explanation

- Blue Vegeta performs best when supported by assists and allowed to dictate the pace of the match.
-

Assist Analysis

A Assist

Provides

- Neutral support.
- Combo extensions.
- Pressure assistance.

Best Partners

- Rushdown teams.
 - Characters needing stronger confirms.
-

B Assist

Provides

- Pressure utility.
- Offensive support.

Best Partners

- Aggressive team structures.

C Assist

Provides

- Easy confirms.
- Fullscreen conversions.

Drawbacks

- Long cooldown.
-

DHC Synergy

Characters That Love DHCing Into Blue Vegeta

- Characters seeking damage.
- Characters wanting corner carry.

Why

- Blue Vegeta converts opportunities into tremendous reward.
-

Characters Blue Vegeta Loves DHCing Into

- Strong anchors.
- Cashout characters.

Why

- Maximizes the value of offensive momentum.
-

Best Team Archetypes

Rushdown → Kill

Why It Works

- Blue Vegeta creates openings.
- Team converts them into kills.

Example Teams

- Blue Vegeta / Android 18 / Base Goku
 - Blue Vegeta / Adult Gohan / Tien
-

Pressure → Snowball

Why It Works

- Successful offense leads directly into stronger offense.
- Opponents struggle to regain control.

Example Teams

- Blue Vegeta / Kid Buu / Janemba
 - Blue Vegeta / Cell / Base Goku
-

Win Conditions

Primary Win Condition

- Establish pressure and force defensive mistakes.

Secondary Win Condition

- Convert successful openings into overwhelming damage.

Late-Game Win Condition

- Leverage damage output to close matches before opponents can recover.
-

Team Building Questions

Blue Vegeta Wants Teammates Who...

- Improve pressure.
- Extend combos.
- Support aggressive play.

Blue Vegeta Struggles To Provide...

- Dedicated support.
- Elite neutral control.
- Anchor stability.

Before Adding Blue Vegeta Ask:

- Does my team want to play aggressively?
 - Can my team support a point character?
 - Does my team already have enough support?
-

Summary

Why Pick Blue Vegeta?

- Excellent damage.
- Strong pressure.
- Powerful momentum.

Why Avoid Blue Vegeta?

- Team needs support.
- Team needs a dedicated anchor.

Final Verdict

- A pressure-focused point character that thrives when surrounded by teammates who can support and amplify his offense.

VEGETA (BASE)

Character Identity

Primary Roles

- Battery
- Point
- Enabler

Team Archetypes

- Resource-Based
- Rushdown
- Neutral
- Momentum

One-Sentence Summary

- A resource-generating point character that excels at building meter, controlling space, and enabling powerful teammates later in the match.

What This Character Contributes

Damage

- Good damage output.
- Strong corner conversions.
- Excellent reward from common confirms.

Neutral

- One of the strongest neutral characters in the game.
- Dominates space with ki blasts.
- Forces opponents to navigate difficult projectile patterns.

Mix

- Strong offensive structure.
- Benefits heavily from assists.
- Creates numerous opportunities from neutral wins.

Support

- Useful assists.
- Primarily contributes through meter generation and screen control.

Resource Economy

- One of the best meter builders in DBFZ.
- Generates resources naturally through his gameplan.
- Allows teammates to spend aggressively.

Team Placement

Point

- Viable: Excellent

Why

- Maximizes meter generation.
- Benefits heavily from assists.
- Establishes team momentum early.

Mid

- Viable: Good

Why

- Still offers strong neutral and damage.

Anchor

- Viable: Situational

Why

- Strong neutral.
- Less effective without support.

Preferred Position

- Point

Explanation

- Base Vegeta is most valuable when given access to assists and allowed to build resources for the rest of the team.
-

Assist Analysis

A Assist

Provides

- Neutral control.
- Projectile coverage.
- Combo extensions.

Best Partners

- Rushdown characters.
 - Characters that struggle approaching.
-

B Assist

Provides

- Pressure support.
- Offensive utility.

Best Partners

- Aggressive team compositions.
-

C Assist

Provides

- Easy confirms.
- Long-range conversions.

Drawbacks

- Long cooldown.
-

DHC Synergy

Characters That Love DHCing Into Base Vegeta

- Meter-hungry characters.
- Pressure-focused characters.

Why

- Base Vegeta creates resources and momentum.
-

Characters Base Vegeta Loves DHCing Into

- Cashout characters.
- Strong anchors.

Why

- Maximizes the reward of the resources he generates.
-

Best Team Archetypes

Battery → Cashout

Why It Works

- Base Vegeta builds resources.
- Teammates spend them efficiently.

Example Teams

- Base Vegeta / DBS Broly / Base Goku
 - Base Vegeta / Adult Gohan / Tien
-

Neutral → Resource Advantage

Why It Works

- Base Vegeta wins space.
- Team leverages growing meter advantage.

Example Teams

- Base Vegeta / Janemba / Base Goku
 - Base Vegeta / Android 18 / Tien
-

Win Conditions

Primary Win Condition

- Build a meter advantage over time.

Secondary Win Condition

- Convert neutral dominance into team momentum.

Late-Game Win Condition

- Enable resource-hungry teammates through superior economy.
-

Team Building Questions

Base Vegeta Wants Teammates Who...

- Spend meter effectively.
- Benefit from strong neutral.
- Reward resource generation.

Base Vegeta Struggles To Provide...

- Dedicated support.
- Lockdown utility.
- Solo comeback power.

Before Adding Base Vegeta Ask:

- Does my team need meter generation?
 - Does my team need stronger neutral?
 - Do my teammates convert resources well?
-

Summary

Why Pick Base Vegeta?

- Exceptional meter gain.
- Strong neutral.
- Excellent point character.

Why Avoid Base Vegeta?

- Team already has strong economy.
- Team needs more support utility.

Final Verdict

- A premier battery character whose ability to generate resources makes him an ideal foundation for many powerful team compositions.

GOHAN (TEEN)

Character Identity

Primary Roles

- Damage
- Point
- Snowball

Team Archetypes

- Rushdown
- Pressure
- Touch-of-Death
- Resource-Based

One-Sentence Summary

- A high-reward point character that turns successful openings into overwhelming damage and forces opponents to respect every touch.
-

What This Character Contributes

Damage

- Exceptional.
- Among the highest damage outputs in the game.
- Converts almost every clean hit into meaningful reward.

Neutral

- Solid but assist dependent.
- Relies on movement and support to begin offense.

Mix

- Strong offensive pressure.
- Excellent reward from successful mixups.
- Becomes increasingly threatening as resources grow.

Support

- Limited.
- Primarily contributes through damage output.

Resource Economy

- Excellent meter usage.
 - Gains enormous value from resources.
 - Functions as one of the game's strongest cashout characters.
-

Team Placement

Point

- Viable: Excellent

Why

- Uses assists extremely well.
- Maximizes offensive pressure.
- Gains access to devastating conversions.

Mid

- Viable: Good

Why

- Can capitalize on resources generated by teammates.

Anchor

- Viable: Situational

Why

- Dangerous solo.
- Usually stronger with support.

Preferred Position

- Point

Explanation

- Teen Gohan is at his strongest when backed by assists that help him begin offense and maximize damage.
-

Assist Analysis

A Assist

Provides

- Neutral support.
- Combo utility.

- Reliable confirms.

Best Partners

- Characters needing stronger confirms.
 - Pressure teams.
-

B Assist

Provides

- Combo extension.
- Pressure utility.

Best Partners

- Aggressive compositions.
-

C Assist

Provides

- Easy confirms.
- Fullscreen conversion potential.

Drawbacks

- Long cooldown.
-

DHC Synergy

Characters That Love DHCing Into Teen Gohan

- Neutral-focused characters.
- Battery characters.

Why

- Teen Gohan converts opportunities into massive damage.
-

Characters Teen Gohan Loves DHCing Into

- Anchors.
- Strong resource users.

Why

- Maximizes team damage efficiency.

Best Team Archetypes

Battery → Cashout

Why It Works

- Teammates build resources.
- Teen Gohan spends them efficiently.

Example Teams

- Base Vegeta / Teen Gohan / Base Goku
 - Krillin / Teen Gohan / Tien
-

Touch → Death

Why It Works

- Every successful opening becomes a major threat.

Example Teams

- Teen Gohan / Adult Gohan / Tien
 - Teen Gohan / Android 18 / DBS Broly
-

Win Conditions

Primary Win Condition

- Land a clean hit and convert it into overwhelming damage.

Secondary Win Condition

- Use offensive momentum to force repeated mistakes.

Late-Game Win Condition

- Abuse high damage scaling and strong resource conversion.
-

Team Building Questions

Teen Gohan Wants Teammates Who...

- Build meter.
- Support offense.
- Help him approach safely.

Teen Gohan Struggles To Provide...

- Team utility.
- Strong support.
- Resource generation.

Before Adding Teen Gohan Ask:

- Can my team support a point character?
 - Can my team generate meter?
 - Does my team need a stronger win condition?
-

Summary**Why Pick Teen Gohan?**

- Incredible damage.
- Strong pressure.
- Excellent payoff on successful offense.

Why Avoid Teen Gohan?

- Team lacks support.
- Team lacks resource generation.

Final Verdict

- A premier payoff character that rewards strong team support with some of the most explosive damage in DBFZ.

GOHAN (ADULT)

Character Identity**Primary Roles**

- Scaler
- Pressure
- Mid

Team Archetypes

- Resource-Based
- Pressure
- Fundamentals

- Snowball

One-Sentence Summary

- A scaling powerhouse that becomes increasingly threatening as resources are invested into him, rewarding strong fundamentals with some of the best pressure in the game.
-

What This Character Contributes

Damage

- Good at baseline.
- Excellent once powered up.
- Scales harder than most characters as the match progresses.

Neutral

- Solid.
- Rewards strong fundamentals.
- Becomes more threatening as levels increase.

Mix

- Exceptional.
- One of the strongest pressure characters in DBFZ when developed.
- Forces opponents into repeated defensive situations.

Support

- Good assists.
- Strong team synergy.
- Can contribute from multiple positions.

Resource Economy

- Resource hungry.
 - Wants meter investment.
 - Repays investment with increased effectiveness.
-

Team Placement

Point

- Viable: Good

Why

- Can begin building levels early.
- Uses assists well.

Mid

- Viable: Excellent

Why

- Often enters with resources already available.
- Can immediately begin scaling.

Anchor

- Viable: Good

Why

- Strong solo character.
- Level investment carries into late game.

Preferred Position

- Mid

Explanation

- Adult Gohan performs best when teammates can help him acquire levels without forcing him to spend all resources himself.
-

Assist Analysis

A Assist

Provides

- Neutral support.
- Combo extensions.
- Reliable confirms.

Best Partners

- Rushdown characters.
 - Pressure-focused teams.
-

B Assist

Provides

- Offensive utility.

- Pressure support.

Best Partners

- Teams focused on maintaining momentum.
-

C Assist

Provides

- Easy confirms.
- Long-range conversion potential.

Drawbacks

- Long cooldown.
-

DHC Synergy

Characters That Love DHCing Into Adult Gohan

- Battery characters.
- Neutral-focused characters.

Why

- Adult Gohan gains enormous value from resources and momentum.
-

Characters Adult Gohan Loves DHCing Into

- Anchors.
- Strong cashout characters.

Why

- Converts pressure into kills efficiently.
-

Special DHC Interactions

Level Investment

- One of the few characters where spending meter can directly improve future performance.
 - Teams often build around accelerating his development.
-

Best Team Archetypes

Battery → Scaler

Why It Works

- Resources are generated early.
- Adult Gohan transforms those resources into pressure and mix.

Example Teams

- Base Vegeta / Adult Gohan / Base Goku
 - Krillin / Adult Gohan / Tien
-

Pressure → Snowball

Why It Works

- Each successful interaction makes future interactions stronger.

Example Teams

- Android 18 / Adult Gohan / Janemba
 - Blue Goku / Adult Gohan / Tien
-

Win Conditions

Primary Win Condition

- Invest resources into Adult Gohan and overwhelm opponents with increasingly powerful offense.

Secondary Win Condition

- Use strong pressure and mix to force defensive errors.

Late-Game Win Condition

- Leverage accumulated levels to dominate neutral and offense.
-

Team Building Questions

Adult Gohan Wants Teammates Who...

- Generate meter.
- Help him level safely.
- Benefit from strong pressure.

Adult Gohan Struggles To Provide...

- Early-game explosiveness.

- Resource generation.
- Dedicated support utility.

Before Adding Adult Gohan Ask:

- Can my team generate meter?
 - Can my team support a scaling character?
 - Does my team benefit from long-term investment?
-

Summary**Why Pick Adult Gohan?**

- Exceptional scaling.
- Elite pressure.
- Strong long-term value.

Why Avoid Adult Gohan?

- Team lacks meter generation.
- Team needs immediate payoff.

Final Verdict

- A scaling specialist whose value grows throughout the match, rewarding teams that can invest resources into his development.

PICCOLO

Character Identity**Primary Roles**

- Setplay
- Mix
- Mid

Team Archetypes

- Setplay
- Control
- Mix
- Resource-Based

One-Sentence Summary

- A setplay specialist that transforms successful hits into oppressive offense, forcing opponents into repeated high-risk defensive situations.
-

What This Character Contributes

Damage

- Good damage.
- Excellent reward when setplay is established.
- Strong corner conversions.

Neutral

- Functional but not dominant.
- Relies on assists and positioning.
- Wants to transition from neutral into offense quickly.

Mix

- Exceptional.
- One of the strongest setplay characters in DBFZ.
- Creates layered offensive situations that are difficult to defend consistently.

Support

- Strong assists.
- Excellent synergy with many pressure characters.
- Helps teams establish offensive momentum.

Resource Economy

- Uses resources effectively.
 - Benefits heavily from meter investment.
 - Converts resources into stronger offensive sequences.
-

Team Placement

Point

- Viable: Good

Why

- Gains access to assists.

- Can establish setplay early.

Mid

- Viable: Excellent

Why

- Enters with resources available.
- Can immediately threaten offense.

Anchor

- Viable: Situational

Why

- Dangerous solo.
- Loses access to many setplay layers.

Preferred Position

- Mid

Explanation

- Piccolo is strongest when surrounded by teammates that help him establish offense and maintain pressure.
-

Assist Analysis

A Assist

Provides

- Neutral utility.
- Combo extensions.
- Pressure support.

Best Partners

- Rushdown characters.
 - Mix-focused teams.
-

B Assist

Provides

- Lockdown.
- Offensive utility.

Best Partners

- Characters that rely on pressure.
-

C Assist

Provides

- Easy confirms.
- Long-range conversions.

Drawbacks

- Long cooldown.
-

DHC Synergy

Characters That Love DHCing Into Piccolo

- Battery characters.
- Neutral-focused characters.

Why

- Piccolo turns successful openings into oppressive offense.
-

Characters Piccolo Loves DHCing Into

- Strong anchors.
- High damage cashout characters.

Why

- Maximizes reward from successful mixups.
-

Special DHC Interactions

Setplay Loops

- Piccolo can repeatedly force difficult defensive situations after successful hits.
 - Teams often build around enabling these situations.
-

Best Team Archetypes

Battery → Setplay

Why It Works

- Resources fuel stronger offensive sequences.

Example Teams

- Base Vegeta / Piccolo / Base Goku
 - Krillin / Piccolo / Tien
-

Control → Mix

Why It Works

- Neutral-focused characters create opportunities.
- Piccolo converts them into layered offense.

Example Teams

- Frieza / Piccolo / Janemba
 - SSJ Goku / Piccolo / Base Goku
-

Win Conditions

Primary Win Condition

- Establish setplay and repeatedly force defensive guesses.

Secondary Win Condition

- Maintain offensive momentum through layered pressure.

Late-Game Win Condition

- Overwhelm opponents through superior offensive structure.
-

Team Building Questions

Piccolo Wants Teammates Who...

- Generate meter.
- Provide strong assists.
- Help establish offense.

Piccolo Struggles To Provide...

- Strong neutral dominance.
- Resource generation.
- Simple gameplans.

Before Adding Piccolo Ask:

- Can my team support setplay?
 - Can my team generate resources?
 - Does my team benefit from stronger mix?
-

Summary

Why Pick Piccolo?

- Elite setplay.
- Strong mix.
- Excellent offensive reward.

Why Avoid Piccolo?

- Team lacks support.
- Team wants a simpler gameplan.

Final Verdict

- A setplay specialist that rewards preparation, structure, and offensive creativity with some of the most threatening pressure in DBFZ.

FRIEZA

Character Identity

Primary Roles

- Control
- Anchor
- Neutral

Team Archetypes

- Control
- Zoning
- Attrition
- Resource-Based

One-Sentence Summary

- A control-focused character that dominates space, frustrates approaches, and forces opponents to play the match on his terms.
-

What This Character Contributes

Damage

- Good damage.
- Strong resource conversion.
- Excellent kill potential with meter.

Neutral

- Exceptional.
- Controls multiple areas of the screen simultaneously.
- Forces opponents into predictable movement patterns.

Mix

- Functional.
- Relies more on neutral wins than layered offense.
- Creates pressure through screen control rather than traditional mix.

Support

- Strong assists.
- Helps teammates establish control.
- Supports slower team structures effectively.

Resource Economy

- Uses meter efficiently.
- Gains tremendous value from resources.
- Golden Frieza creates powerful win conditions.

Team Placement

Point

- Viable: Situational

Why

- Can establish screen control early.
- Usually prefers stronger support behind him.

Mid

- Viable: Excellent

Why

- Provides team utility.
- Can capitalize on earlier momentum.

Anchor

- Viable: Excellent

Why

- Strong solo neutral.
- Golden Frieza.
- Exceptional comeback potential.

Preferred Position

- Anchor

Explanation

- Frieza is strongest when resources are available and the match has slowed down enough for him to control the pace.
-

Assist Analysis**A Assist****Provides**

- Neutral control.
- Projectile coverage.
- Space denial.

Best Partners

- Characters with strong offense.
 - Characters needing help approaching.
-

B Assist**Provides**

- Control.
- Utility.
- Screen management.

Best Partners

- Neutral-focused teams.

C Assist

Provides

- Easy confirms.
- Long-range conversions.

Drawbacks

- Long cooldown.
-

DHC Synergy

Characters That Love DHCing Into Frieza

- Rushdown characters.
- Point characters.

Why

- Frieza safely takes over neutral after offense ends.
-

Characters Frieza Loves DHCing Into

- High damage cashout characters.

Why

- Converts control into kills.
-

Special DHC Interactions

Golden Frieza

- One of the strongest late-game transformations in DBFZ.
 - Teams often save resources specifically for this win condition.
-

Best Team Archetypes

Control → Cashout

Why It Works

- Frieza controls the match.
- Teammates capitalize on mistakes.

Example Teams

- Android 18 / DBS Broly / Frieza
 - Cell / Janemba / Frieza
-

Attrition → Win Condition

Why It Works

- Opponents slowly lose ground.
- Frieza becomes stronger as resources accumulate.

Example Teams

- Zamasu / Piccolo / Frieza
 - SSJ Goku / Adult Gohan / Frieza
-

Win Conditions

Primary Win Condition

- Control space and force mistakes.

Secondary Win Condition

- Build toward Golden Frieza.

Late-Game Win Condition

- Leverage Golden Frieza and strong solo neutral to overwhelm opponents.
-

Team Building Questions

Frieza Wants Teammates Who...

- Benefit from screen control.
- Can convert neutral wins into damage.
- Appreciate strong assists.

Frieza Struggles To Provide...

- Fast offensive momentum.
- Explosive rushdown.
- Simple gameplans.

Before Adding Frieza Ask:

- Does my team want stronger neutral?
- Does my team need an anchor?

- Can my team capitalize on forced mistakes?
-

Summary

Why Pick Frieza?

- Elite screen control.
- Strong anchor value.
- Excellent comeback potential.

Why Avoid Frieza?

- Team wants constant aggression.
- Team lacks damage conversion.

Final Verdict

- A control specialist that rewards patience, positioning, and resource management with some of the strongest neutral presence in the game.

CELL

Character Identity

Primary Roles

- Neutral
- Pressure
- Point

Team Archetypes

- Fundamentals
- Balanced
- Pressure
- Neutral

One-Sentence Summary

- A fundamentally strong character that excels at winning neutral, converting opportunities consistently, and applying reliable pressure in every game state.
-

What This Character Contributes

Damage

- Strong damage output.
- Excellent corner carry.
- Consistent reward from nearly every hit.

Neutral

- Exceptional.
- Strong air presence.
- Excellent movement options.
- Wins interactions through superior positioning.

Mix

- Strong pressure.
- Reliable offensive structure.
- Benefits greatly from assist support.

Support

- Good assists.
- Easy integration into team compositions.
- Rarely creates synergy problems.

Resource Economy

- Efficient.
- Uses meter well without relying on it.
- Functions effectively regardless of resource state.

Team Placement

Point

- Viable: Excellent

Why

- Uses assists extremely well.
- Establishes momentum early.
- Strong neutral lets him start the team's offense.

Mid

- Viable: Excellent

Why

- Flexible positioning.
- Strong individual value.

Anchor

- Viable: Good

Why

- Strong solo neutral.
- Lacks some dedicated anchor tools.

Preferred Position

- Point / Mid

Explanation

- Cell's flexibility allows him to fit into almost any team while providing stable value throughout the match.
-

Assist Analysis**A Assist****Provides**

- Neutral support.
- Combo extensions.
- Pressure assistance.

Best Partners

- Rushdown characters.
 - Mix-focused teams.
-

B Assist**Provides**

- Utility.
- Combo support.

Best Partners

- Teams requiring stable extensions.
-

C Assist

Provides

- Easy confirms.
- Fullscreen conversions.

Drawbacks

- Long cooldown.
-

DHC Synergy

Characters That Love DHCing Into Cell

- Battery characters.
- Neutral-focused characters.

Why

- Cell converts openings consistently and maintains momentum.
-

Characters Cell Loves DHCing Into

- Cashout characters.
- Anchors.

Why

- Maximizes team reward after successful pressure.
-

Best Team Archetypes

Neutral → Pressure

Why It Works

- Cell wins space.
- Team converts that advantage into offense.

Example Teams

- Cell / Android 18 / Base Goku
 - Cell / Adult Gohan / Tien
-

Balanced Core

Why It Works

- Cell covers weaknesses naturally.

- Functions in nearly every matchup.

Example Teams

- Cell / Janemba / Base Goku
 - Cell / Frieza / Tien
-

Win Conditions

Primary Win Condition

- Win neutral consistently and convert opportunities efficiently.

Secondary Win Condition

- Maintain pressure through superior positioning and conversions.

Late-Game Win Condition

- Leverage strong fundamentals to outplay opponents in neutral.
-

Team Building Questions

Cell Wants Teammates Who...

- Benefit from strong neutral.
- Appreciate reliable assists.
- Reward consistent pressure.

Cell Struggles To Provide...

- Extreme setplay.
- Dedicated support utility.
- Specialized win conditions.

Before Adding Cell Ask:

- Does my team need stronger fundamentals?
 - Does my team need a more reliable point?
 - Does my team value flexibility?
-

Summary

Why Pick Cell?

- Excellent neutral.
- Strong pressure.

- Flexible positioning.

Why Avoid Cell?

- Team needs a specialist.
- Team already has a similar role covered.

Final Verdict

- A fundamentals-focused powerhouse that provides reliable value in nearly every team composition and matchup.

ANDROID 18

Character Identity

Primary Roles

- Mix
- Point
- Setplay

Team Archetypes

- Mix
- Pressure
- Setplay
- Snowball

One-Sentence Summary

- A mix-focused point character that uses 17 and assist support to create layered offensive situations capable of overwhelming even strong defenders.

What This Character Contributes

Damage

- Good damage.
- Excellent reward from successful mix.
- Strong corner conversions.

Neutral

- Functional.
- Relies on assists more than dedicated neutral characters.
- Wants to transition into offense as quickly as possible.

Mix

- Elite.
- One of the strongest offensive characters in DBFZ.
- Forces repeated defensive guesses.

Support

- Useful assists.
- Strong team synergy.
- Helps offensive teams maintain momentum.

Resource Economy

- Efficient.
 - Doesn't require excessive meter.
 - Converts resources into stronger pressure.
-

Team Placement**Point**

- Viable: Excellent

Why

- Uses assists incredibly well.
- Maximizes mix potential.
- Establishes offense early.

Mid

- Viable: Good

Why

- Can capitalize on existing momentum.

Anchor

- Viable: Situational

Why

- Loses access to many offensive layers without assists.

Preferred Position

- Point

Explanation

- Android 18 gains enormous value from assist support and is strongest when initiating the team's offense.
-

Assist Analysis

A Assist

Provides

- Pressure support.
- Combo extensions.
- Offensive utility.

Best Partners

- Rushdown teams.
 - Pressure-focused characters.
-

B Assist

Provides

- Utility.
- Offensive support.

Best Partners

- Teams that want stronger pressure.
-

C Assist

Provides

- Easy confirms.
- Long-range conversions.

Drawbacks

- Long cooldown.
-

DHC Synergy

Characters That Love DHCing Into Android 18

- Neutral-focused characters.
- Battery characters.

Why

- Android 18 turns successful hits into oppressive offense.
-

Characters Android 18 Loves DHCing Into

- Cashout characters.
- Anchors.

Why

- Converts successful mix into kills.
-

Special DHC Interactions

17 Pressure Sequences

- One of the primary reasons teams are built around Android 18.
 - Creates offensive situations that many teams struggle to replicate.
-

Best Team Archetypes

Mix → Kill

Why It Works

- Android 18 creates openings.
- Teammates maximize reward.

Example Teams

- Android 18 / DBS Broly / Frieza
 - Android 18 / Adult Gohan / Tien
-

Setplay → Snowball

Why It Works

- Successful offense creates additional offensive opportunities.
- Difficult for opponents to escape momentum.

Example Teams

- Android 18 / Piccolo / Base Goku
 - Android 18 / Janemba / Tien
-

Win Conditions

Primary Win Condition

- Force defensive mistakes through layered mix.

Secondary Win Condition

- Maintain offensive momentum once pressure begins.

Late-Game Win Condition

- Use strong offensive structure to overwhelm weakened teams.
-

Team Building Questions

Android 18 Wants Teammates Who...

- Provide strong assists.
- Capitalize on successful mix.
- Benefit from offensive momentum.

Android 18 Struggles To Provide...

- Elite fullscreen neutral.
- Resource generation.
- Solo anchor value.

Before Adding Android 18 Ask:

- Does my team support point characters?
 - Does my team reward mix?
 - Does my team need a stronger win condition?
-

Summary

Why Pick Android 18?

- Elite mix.
- Strong setplay.
- Excellent offensive reward.

Why Avoid Android 18?

- Team lacks assist support.
- Team needs stronger neutral.

Final Verdict

- One of the premier mix characters in DBFZ, capable of turning a single opening into a relentless offensive sequence.

ANDROID 16

Character Identity

Primary Roles

- Grappler
- Control
- Point

Team Archetypes

- Grappler
- Pressure
- Control
- Punish

One-Sentence Summary

- A command-grab specialist that forces opponents to constantly respect high-reward threats, creating opportunities through fear and conditioning.
-

What This Character Contributes

Damage

- Exceptional.
- Among the highest reward characters on successful reads.
- Turns mistakes into devastating damage.

Neutral

- Solid.
- Uses large buttons and threat ranges effectively.
- Controls space through the fear of punishment.

Mix

- Strike/throw focused.
- Forces opponents into difficult defensive decisions.
- Relies heavily on conditioning.

Support

- Strong assists.
- Useful for teams that want stronger offense.
- Provides unique utility through his threat profile.

Resource Economy

- Efficient.
 - Gains tremendous value from successful openings.
 - Doesn't require excessive meter to be threatening.
-

Team Placement

Point

- Viable: Excellent

Why

- Uses assists well.
- Establishes offensive threat immediately.

Mid

- Viable: Good

Why

- Can capitalize on established momentum.

Anchor

- Viable: Situational

Why

- Threat remains strong.
- Loses some effectiveness without assists.

Preferred Position

- Point

Explanation

- Android 16 performs best when supported by assists that help him establish pressure and threaten command grabs.
-

Assist Analysis

A Assist

Provides

- Neutral utility.
- Combo extensions.
- Pressure support.

Best Partners

- Rushdown characters.
 - Pressure-focused teams.
-

B Assist

Provides

- Offensive utility.
- Threat reinforcement.

Best Partners

- Characters that benefit from strike/throw pressure.
-

C Assist

Provides

- Easy confirms.
- Long-range conversion potential.

Drawbacks

- Long cooldown.
-

DHC Synergy

Characters That Love DHCing Into Android 16

- Neutral-focused characters.
- Mix-focused characters.

Why

- Android 16 turns momentum into fear-based offense.
-

Characters Android 16 Loves DHCing Into

- Cashout characters.
- Strong anchors.

Why

- Maximizes reward after successful reads.
-

Special DHC Interactions

Command Grab Threat

- The constant threat of command grabs changes opponent behavior.
 - Teams can build entire offensive structures around this pressure.
-

Best Team Archetypes

Threat → Cashout

Why It Works

- Android 16 forces mistakes.
- Teammates maximize reward.

Example Teams

- Android 16 / DBS Broly / Tien
 - Android 16 / Base Goku / Janemba
-

Grappler → Pressure

Why It Works

- Opponents become afraid to defend normally.
- Creates opportunities for the rest of the team.

Example Teams

- Android 16 / Android 18 / Frieza
 - Android 16 / Adult Gohan / Base Goku
-

Win Conditions

Primary Win Condition

- Force defensive hesitation through command-grab threat.

Secondary Win Condition

- Punish incorrect defensive decisions with massive reward.

Late-Game Win Condition

- Leverage fear and conditioning to secure openings.
-

Team Building Questions

Android 16 Wants Teammates Who...

- Capitalize on fear-based pressure.
- Benefit from strong assists.
- Reward successful openings.

Android 16 Struggles To Provide...

- Elite fullscreen control.
- Resource generation.
- Flexible team support.

Before Adding Android 16 Ask:

- Does my team benefit from strike/throw pressure?
 - Can my team support a grappler?
 - Do I need a stronger offensive threat?
-

Summary

Why Pick Android 16?

- Massive reward.
- Strong command-grab threat.
- Excellent conditioning tools.

Why Avoid Android 16?

- Team needs stronger neutral.
- Team lacks assist support.

Final Verdict

- A grappler specialist that weaponizes fear, forcing opponents into mistakes and converting those mistakes into devastating damage.

KRILLIN

Character Identity

Primary Roles

- Enabler
- Support
- Point

Team Archetypes

- Support
- Fundamentals
- Resource-Based
- Balanced

One-Sentence Summary

- A utility-focused character that enhances teammates through strong assists, resource generation, and exceptional team synergy.
-

What This Character Contributes

Damage

- Good damage.
- Excellent conversions.
- Strong reward from optimized routes.

Neutral

- Solid.
- Strong grounded control.
- Uses movement and utility to create opportunities.

Mix

- Functional.
- Benefits heavily from assists.
- Creates opportunities through strong fundamentals rather than oppressive mix.

Support

- Exceptional.
- One of the best team-oriented characters in DBFZ.

- Enhances nearly every archetype.

Resource Economy

- Excellent.
 - Generates value consistently.
 - Supports both resource-hungry and resource-efficient teams.
-

Team Placement

Point

- Viable: Excellent

Why

- Uses assists effectively.
- Builds momentum early.
- Creates opportunities for teammates.

Mid

- Viable: Excellent

Why

- Strong support value.
- Flexible positioning.

Anchor

- Viable: Situational

Why

- Functional solo.
- Stronger when supporting others.

Preferred Position

- Point / Mid

Explanation

- Krillin's greatest strength is enabling the rest of the team rather than acting as the primary win condition himself.
-

Assist Analysis

A Assist

Provides

- Utility.
- Combo extensions.
- Team support.

Best Partners

- Nearly the entire cast.

Why

- Flexible utility that improves team consistency.
-

B Assist

Provides

- Resource support.
- Neutral utility.

Best Partners

- Resource-hungry teams.
-

C Assist

Provides

- Easy confirms.

Drawbacks

- Long cooldown.
-

DHC Synergy

Characters That Love DHCing Into Krillin

- Pressure characters.
- Neutral-focused characters.

Why

- Krillin maintains momentum and supports future interactions.
-

Characters Krillin Loves DHCing Into

- Cashout characters.
- Strong anchors.

Why

- Krillin creates opportunities that teammates can maximize.
-

Special DHC Interactions

Senzu Utility

- One of the most unique support mechanics in DBFZ.
- Creates team-building opportunities unavailable to most characters.

Rock Utility

- Alters neutral interactions.
 - Creates unusual offensive situations.
-

Best Team Archetypes

Enabler → Cashout

Why It Works

- Krillin creates opportunities.
- Teammates maximize reward.

Example Teams

- Krillin / DBS Broly / Tien
 - Krillin / Adult Gohan / Base Goku
-

Support Core

Why It Works

- Krillin improves overall team consistency.
- Teammates benefit from enhanced utility.

Example Teams

- Krillin / Piccolo / Frieza
 - Krillin / Android 18 / Janemba
-

Win Conditions

Primary Win Condition

- Enable stronger teammates to succeed.

Secondary Win Condition

- Use utility and consistency to win repeated interactions.

Late-Game Win Condition

- Leverage strong fundamentals and resource management.
-

Team Building Questions

Krillin Wants Teammates Who...

- Appreciate support.
- Benefit from utility.
- Convert opportunities effectively.

Krillin Struggles To Provide...

- Extreme mix.
- Elite neutral dominance.
- Massive solo comeback potential.

Before Adding Krillin Ask:

- Does my team need support?
 - Does my team need consistency?
 - Does my team already have strong finishers?
-

Summary

Why Pick Krillin?

- Excellent support.
- Incredible synergy.
- Strong utility.

Why Avoid Krillin?

- Team needs a dedicated win condition.
- Team needs stronger solo presence.

Final Verdict

- One of the premier enablers in DBFZ, capable of making good teams better and great teams terrifying.

YAMCHA

Character Identity

Primary Roles

- Glue
- Anchor
- Enabler

Team Archetypes

- Rushdown
- Pressure
- Balanced
- Support

One-Sentence Summary

- A team-oriented character that enhances offensive consistency through exceptional assist value, strong pressure, and reliable anchor presence.
-

What This Character Contributes

Damage

- Good damage.
- Excellent conversions.
- Reliable reward from common situations.

Neutral

- Solid.
- Mobile.
- Uses movement to create opportunities rather than dominate space.

Mix

- Strong.
- Excellent pressure support.
- Creates offensive situations that are difficult to challenge.

Support

- Exceptional.
- Historically one of the best support characters in DBFZ.
- Improves nearly every offensive gameplan.

Resource Economy

- Efficient.
 - Doesn't require large resource investments.
 - Functions well in almost any economy.
-

Team Placement

Point

- Viable: Good

Why

- Uses assists effectively.
- Can establish offense.

Mid

- Viable: Excellent

Why

- Strong support value.
- Maintains team momentum.

Anchor

- Viable: Excellent

Why

- Strong solo offense.
- Excellent comeback potential.
- Historically one of the game's premier anchors.

Preferred Position

- Anchor

Explanation

- Yamcha's value increases dramatically when he can support teammates before becoming a threatening late-game character himself.

Assist Analysis

A Assist

Provides

- Pressure support.
- Mix support.
- Combo extensions.

Best Partners

- Android 18
- Adult Gohan
- Cell
- Teen Gohan

Why

- Enables offensive situations that would otherwise be impossible.
-

B Assist

Provides

- Utility.
- Pressure support.

Best Partners

- Aggressive teams.
-

C Assist

Provides

- Easy confirms.
- Long-range conversion potential.

Drawbacks

- Long cooldown.

- Yamcha maintains offensive momentum extremely well.
-

Characters Yamcha Loves DHCing Into

- Cashout characters.
- Damage-focused anchors.

Why

- Maximizes reward after creating openings.
-

Special DHC Interactions

Offensive Continuity

- One of Yamcha's greatest strengths.
 - Teams often use him specifically because he keeps offense flowing smoothly.
-

Best Team Archetypes

Mix → Mix

Why It Works

- Yamcha amplifies offensive pressure.
- Teams gain additional layers of offense.

Example Teams

- Android 18 / Adult Gohan / Yamcha
 - Cell / Kid Buu / Yamcha
-

Pressure Core

Why It Works

- Every character benefits from stronger offense.
- Difficult for opponents to escape momentum.

Example Teams

- Teen Gohan / Adult Gohan / Yamcha

- Blue Vegeta / Android 18 / Yamcha
-

Win Conditions

Primary Win Condition

- Maintain offensive momentum.

Secondary Win Condition

- Enable teammates to establish stronger pressure.

Late-Game Win Condition

- Leverage strong solo offense and limit break.
-

Team Building Questions

Yamcha Wants Teammates Who...

- Benefit from pressure.
- Appreciate offensive assists.
- Reward strong momentum.

Yamcha Struggles To Provide...

- Elite screen control.
- Resource generation.
- Specialized utility.

Before Adding Yamcha Ask:

- Does my team want stronger offense?
 - Does my team need a reliable anchor?
 - Does my team benefit from pressure assists?
-

Summary

Why Pick Yamcha?

- Incredible assist value.
- Strong offensive support.
- Reliable anchor.

Why Avoid Yamcha?

- Team needs stronger neutral control.

- Team needs specialized utility.

Final Verdict

- One of DBFZ's greatest glue characters, capable of improving offensive consistency and helping nearly any team function more smoothly.

TIEN

Character Identity

Primary Roles

- Finisher
- Anchor
- Cashout

Team Archetypes

- Damage
- Resource-Based
- Fundamentals
- Comeback

One-Sentence Summary

- A devastating anchor that converts meter into kills, turning successful openings into overwhelming damage and making every late-game interaction dangerous.
-

What This Character Contributes

Damage

- Exceptional.
- Among the best resource-to-damage conversions in DBFZ.
- Threatens kills from situations where most characters cannot.

Neutral

- Solid.
- Honest.
- Relies on strong fundamentals rather than gimmicks.

Mix

- Limited.
- Relies on pressure and damage more than offensive complexity.

Support

- Strong beam assist.
- Useful neutral support.
- Helps teammates navigate neutral safely.

Resource Economy

- One of the game's premier meter users.
 - Gains enormous value from resources.
 - Wants teammates that generate meter.
-

Team Placement

Point

- Viable: Situational

Why

- Functional.
- Doesn't maximize his greatest strengths.

Mid

- Viable: Good

Why

- Can capitalize on existing resources.

Anchor

- Viable: Excellent

Why

- Limit Break.
- Sparking.
- Exceptional cashout potential.

Preferred Position

- Anchor

Explanation

- Tien becomes increasingly threatening as resources accumulate, making him one of the most feared final characters in DBFZ.
-

Assist Analysis

A Assist

Provides

- Beam control.
- Neutral support.
- Combo extensions.

Best Partners

- Nearly every point character.

Why

- Reliable neutral assistance with minimal team-building requirements.
-

B Assist

Provides

- Combo utility.
- Specialized routes.

Best Partners

- Teams seeking higher reward conversions.
-

C Assist

Provides

- Easy confirms.
- Fullscreen conversion potential.

Drawbacks

- Long cooldown.
-

DHC Synergy

Characters That Love DHCing Into Tien

- Literally any character looking to secure a kill.

Why

- Tien converts meter into damage better than almost anyone.
-

Characters Tien Loves DHCing Into

- Resource-generating characters.
- Battery characters.

Why

- More meter equals more robbery.
-

Special DHC Interactions

Chiaotzu

- Unique damage amplification.
- Creates kill opportunities unavailable to most of the roster.

Neo Tri-Beam

- Defines Tien's role as a finisher.
 - One of the strongest cashout tools in DBFZ.
-

Best Team Archetypes

Battery → Finisher

Why It Works

- Team builds resources.
- Tien spends them.

Example Teams

- Base Vegeta / Adult Gohan / Tien
 - Krillin / Roshi / Tien
-

Control → Cashout

Why It Works

- Neutral-focused teams create opportunities.
- Tien ensures those opportunities matter.

Example Teams

- Frieza / Janemba / Tien
 - Cell / Piccolo / Tien
-

Win Conditions

Primary Win Condition

- Build meter and cash out.

Secondary Win Condition

- Leverage superior damage conversion.

Late-Game Win Condition

- Sparking + Limit Break + Resources.
-

Team Building Questions

Tien Wants Teammates Who...

- Build meter.
- Win neutral consistently.
- Create reliable openings.

Tien Struggles To Provide...

- Elite mix.
- Setplay.
- Offensive utility.

Before Adding Tien Ask:

- Can my team generate meter?
 - Do I need stronger damage?
 - Do I need a better comeback character?
-

Summary

Why Pick Tien?

- Incredible damage.
- Elite cashout.
- Outstanding anchor value.

Why Avoid Tien?

- Team lacks meter generation.
- Team needs stronger mix.

Final Verdict

- One of DBFZ's premier finishers, capable of turning resources into dead characters and making every late-game interaction terrifying.

MASTER ROSHI

Character Identity

Primary Roles

- Specialist
- Enabler
- Anchor

Team Archetypes

- Technical
- Control
- Setplay
- Fundamentals

One-Sentence Summary

- A highly technical character that rewards mastery with unique neutral options, unconventional pressure, and exceptional adaptability.
-

What This Character Contributes

Damage

- Strong damage.
- Excellent optimization potential.
- High reward for character mastery.

Neutral

- Unique.
- Attacks angles other characters cannot.
- Forces opponents to play unfamiliar situations.

Mix

- Strong.
- Difficult to defend due to uncommon movement and pressure structures.
- Benefits greatly from creative routing.

Support

- Strong assists.
- Excellent utility.
- Creates opportunities unavailable to most of the roster.

Resource Economy

- Efficient.
 - Doesn't require excessive resources.
 - Gains significant reward from optimization.
-

Team Placement

Point

- Viable: Excellent

Why

- Uses assists effectively.
- Creates unusual neutral situations.

Mid

- Viable: Excellent

Why

- Strong utility.
- Flexible role.

Anchor

- Viable: Excellent

Why

- Strong solo threat.
- Unique neutral remains effective without assists.

Preferred Position

- Mid / Anchor

Explanation

- Roshi's flexibility allows him to contribute in multiple positions while maintaining strong individual value.
-

Assist Analysis

A Assist

Provides

- Neutral utility.
- Combo extensions.
- Team support.

Best Partners

- Fundamentals-based teams.
 - Characters that appreciate utility.
-

B Assist

Provides

- Offensive utility.
- Pressure support.

Best Partners

- Mix-focused teams.
-

C Assist

Provides

- Easy confirms.
- Fullscreen conversion potential.

Drawbacks

- Long cooldown.
-

DHC Synergy

Characters That Love DHCing Into Roshi

- Neutral-focused characters.
- Technical teams.

Why

- Roshi maintains momentum while creating unusual situations.
-

Characters Roshi Loves DHCing Into

- Cashout characters.
- Strong anchors.

Why

- Roshi creates opportunities that teammates can maximize.
-

Special DHC Interactions

Unique Movement

- Roshi's movement changes neutral interactions dramatically.
- Teams gain access to angles and approaches unavailable elsewhere.

No Superdash

- Creates a fundamentally different neutral game.
 - Rewards adaptation and mastery.
-

Best Team Archetypes

Specialist → Finisher

Why It Works

- Roshi creates openings through unpredictability.
- Teammates convert them into damage.

Example Teams

- Roshi / Adult Gohan / Tien
 - Roshi / DBS Broly / Base Goku
-

Technical Core

Why It Works

- Every character contributes unique tools.
- Difficult for opponents to prepare against.

Example Teams

- Roshi / Piccolo / Janemba
 - Roshi / Frieza / Tien
-

Win Conditions

Primary Win Condition

- Force opponents into unfamiliar situations.

Secondary Win Condition

- Leverage unique movement and pressure.

Late-Game Win Condition

- Outplay opponents through adaptability and character mastery.
-

Team Building Questions

Roshi Wants Teammates Who...

- Capitalize on unusual openings.
- Appreciate utility.
- Benefit from creative pressure.

Roshi Struggles To Provide...

- Simple gameplans.
- Straightforward support.
- Easy execution.

Before Adding Roshi Ask:

- Am I comfortable with technical characters?
 - Does my team reward creativity?
 - Can my team capitalize on unique openings?
-

Summary

Why Pick Roshi?

- Unique neutral.
- Strong utility.
- Excellent flexibility.

Why Avoid Roshi?

- Team wants simplicity.
- Team lacks player familiarity.

Final Verdict

- A technical specialist that rewards dedication with some of the most unique and versatile tools in DBFZ.

TRUNKS

Character Identity

Primary Roles

- Adapter
- Neutral
- Anchor

Team Archetypes

- Fundamentals
- Balanced
- Neutral
- Flex

One-Sentence Summary

- A highly adaptable character capable of filling multiple roles while providing strong neutral, mobility, and late-game stability.

What This Character Contributes

Damage

- Good damage.
- Strong corner carry.
- Consistent reward from neutral wins.

Neutral

- Excellent mobility.
- Strong screen presence.
- Can alter pacing better than most characters.

Mix

- Solid.
- Benefits heavily from assists.

- More focused on creating opportunities than forcing guesses.

Support

- Useful assists.
- Strong team flexibility.
- Rarely creates team-building conflicts.

Resource Economy

- Efficient.
 - Doesn't require excessive resources.
 - Uses meter well when available.
-

Team Placement

Point

- Viable: Good

Why

- Uses assists effectively.
- Establishes neutral advantage.

Mid

- Viable: Excellent

Why

- Flexible role.
- Strong transition character.

Anchor

- Viable: Excellent

Why

- Strong solo neutral.
- Excellent mobility.
- Difficult to lock down.

Preferred Position

- Mid / Anchor

Explanation

- Trunks is most valuable when allowed to adapt to the needs of the match and team composition.
-

Assist Analysis

A Assist

Provides

- Neutral support.
- Combo extensions.
- Utility.

Best Partners

- Neutral-focused teams.
 - Flexible compositions.
-

B Assist

Provides

- Pressure utility.
- Offensive support.

Best Partners

- Aggressive teams.
-

C Assist

Provides

- Easy confirms.
- Fullscreen conversions.

Drawbacks

- Long cooldown.
-

DHC Synergy

Characters That Love DHCing Into Trunks

- Point characters.
- Neutral-focused characters.

Why

- Trunks maintains momentum while keeping the team flexible.
-

Characters Trunks Loves DHCing Into

- Cashout characters.
- Strong finishers.

Why

- Converts opportunities into stronger rewards.
-

Special DHC Interactions

Change The Future

- Gives Trunks unique control over screen positioning.
- Creates opportunities for both offense and defense.

Flip Mobility

- One of the defining aspects of his identity.
 - Allows Trunks to alter neutral interactions dramatically.
-

Best Team Archetypes

Neutral → Adaptation

Why It Works

- Trunks fills whatever role the team currently needs.

Example Teams

- Trunks / Adult Gohan / Base Goku
 - Trunks / Frieza / Tien
-

Balanced Core

Why It Works

- Trunks naturally covers weaknesses.
- Functions effectively in multiple matchups.

Example Teams

- Cell / Trunks / Base Goku

- SSJ Goku / Trunks / Yamcha
-

Win Conditions

Primary Win Condition

- Outmaneuver opponents through superior mobility and adaptation.

Secondary Win Condition

- Maintain flexibility throughout the match.

Late-Game Win Condition

- Leverage strong solo neutral and movement to win difficult situations.
-

Team Building Questions

Trunks Wants Teammates Who...

- Appreciate flexibility.
- Benefit from neutral support.
- Reward strong positioning.

Trunks Struggles To Provide...

- Elite mix.
- Massive cashout.
- Specialized utility.

Before Adding Trunks Ask:

- Does my team need flexibility?
 - Does my team need a stronger anchor?
 - Does my team value mobility?
-

Summary

Why Pick Trunks?

- Excellent flexibility.
- Strong mobility.
- Reliable anchor value.

Why Avoid Trunks?

- Team needs a specialist.

- Team requires stronger damage output.

Final Verdict

- A highly adaptable character capable of filling multiple roles while providing stability, mobility, and strong neutral presence.

GOTENKS

Character Identity

Primary Roles

- Setplay
- Mix
- Mid

Team Archetypes

- Setplay
- Pressure
- Technical
- Resource-Based

One-Sentence Summary

- A setplay-focused character that uses unique movement, ghost setups, and layered offense to create situations few characters can replicate.

What This Character Contributes

Damage

- Good damage.
- Excellent reward from optimized routes.
- Strong corner carry.

Neutral

- Strong mobility.
- Difficult movement patterns.
- Creates awkward situations for opponents.

Mix

- Elite.
- Multiple layers of offense.

- Exceptional pressure once momentum is established.

Support

- Strong assists.
- Excellent offensive utility.
- Helps aggressive teams maintain pressure.

Resource Economy

- Uses resources extremely well.
 - Gains significant value from meter investment.
 - Converts resources into stronger setups.
-

Team Placement

Point

- Viable: Excellent

Why

- Uses assists extremely well.
- Establishes offense quickly.

Mid

- Viable: Excellent

Why

- Strong utility.
- Can capitalize on existing momentum.

Anchor

- Viable: Situational

Why

- Dangerous solo.
- Loses access to many setup layers.

Preferred Position

- Point / Mid

Explanation

- Gotenks is strongest when surrounded by assists that help him establish pressure and create setplay opportunities.

Assist Analysis

A Assist

Provides

- Pressure support.
- Combo extensions.
- Offensive utility.

Best Partners

- Mix characters.
- Rushdown teams.

B Assist

Provides

- Utility.
- Lockdown potential.

Best Partners

- Setplay teams.

C Assist

Provides

- Easy confirms.
- Fullscreen conversions.

Drawbacks

- Long cooldown.

DHC Synergy

Characters That Love DHCing Into Gotenks

- Neutral-focused characters.
- Battery characters.

Why

- Gotenks converts momentum into oppressive offense.

Characters Gotenks Loves DHCing Into

- Cashout characters.
- Strong anchors.

Why

- Maximizes reward after successful setups.
-

Special DHC Interactions

Ghost Oki

- One of the defining reasons to play Gotenks.
- Creates unique offensive situations.

Unique Air Mobility

- Alters how neutral is played.
 - Difficult for opponents to prepare against.
-

Best Team Archetypes

Setplay → Cashout

Why It Works

- Gotenks creates the opening.
- Teammates secure the kill.

Example Teams

- Gotenks / DBS Broly / Tien
 - Gotenks / Base Goku / Janemba
-

Mix → Mix

Why It Works

- Offensive momentum compounds rapidly.
- Difficult for opponents to stabilize.

Example Teams

- Android 18 / Gotenks / Tien
- Adult Gohan / Gotenks / Base Goku

Win Conditions

Primary Win Condition

- Establish setplay and force defensive errors.

Secondary Win Condition

- Maintain offensive momentum through layered pressure.

Late-Game Win Condition

- Overwhelm opponents through setup knowledge and execution.
-

Team Building Questions

Gotenks Wants Teammates Who...

- Benefit from pressure.
- Reward successful setups.
- Appreciate offensive assists.

Gotenks Struggles To Provide...

- Simple gameplans.
- Elite fullscreen control.
- Easy execution.

Before Adding Gotenks Ask:

- Does my team support setplay?
 - Can my team capitalize on mix?
 - Am I willing to learn technical setups?
-

Summary

Why Pick Gotenks?

- Incredible setplay.
- Elite mix.
- Unique offensive structure.

Why Avoid Gotenks?

- Team wants simplicity.
- Team lacks support.

Final Verdict

- A setplay specialist capable of creating offensive situations unlike any other character in DBFZ.

KID BUU

Character Identity

Primary Roles

- Mix
- Enabler
- Mid

Team Archetypes

- Mix
- Pressure
- Rushdown
- Snowball

One-Sentence Summary

- A mix-focused specialist whose ability to create offensive opportunities makes him one of the strongest enablers in the game.

What This Character Contributes

Damage

- Good damage.
- Strong corner carry.
- Reliable reward from successful offense.

Neutral

- Excellent mobility.
- Strong air control.
- Difficult to pin down.

Mix

- Elite.

- Among the strongest mix characters in DBFZ history.
- Forces repeated defensive guesses.

Support

- Exceptional.
- One of the most influential offensive assists in the game.
- Improves nearly every pressure-based character.

Resource Economy

- Efficient.
- Doesn't require excessive resources.
- Gains tremendous value from assist usage.

Team Placement

Point

- Viable: Excellent

Why

- Uses assists extremely well.
- Establishes offensive momentum quickly.

Mid

- Viable: Excellent

Why

- Gives tremendous value through assists.
- Maintains offensive pressure.

Anchor

- Viable: Situational

Why

- Strong solo.
- Loses access to some of his most oppressive team utility.

Preferred Position

- Mid

Explanation

- Kid Buu's assist value often makes him more valuable supporting a point character than leading the team himself.
-

Assist Analysis

A Assist

Provides

- Lockdown.
- Mix support.
- Pressure extension.

Best Partners

- Android 18
- Cell
- Adult Gohan
- Blue Vegeta

Why

- Enables offensive sequences that would otherwise be impossible.
-

B Assist

Provides

- Neutral utility.
- Combo support.

Best Partners

- Teams needing additional flexibility.
-

C Assist

Provides

- Easy confirms.
- Long-range conversions.

Drawbacks

- Long cooldown.
-

DHC Synergy

Characters That Love DHCing Into Kid Buu

- Neutral-focused characters.
- Battery characters.

Why

- Kid Buu converts momentum into terrifying offense.
-

Characters Kid Buu Loves DHCing Into

- Cashout characters.
- Strong anchors.

Why

- Maximizes reward after successful mix.
-

Special DHC Interactions

Lockdown Pressure

- One of the defining reasons to play Kid Buu.
- Creates offensive opportunities for the entire team.

Air Mobility

- Gives Kid Buu unusual control over offensive pacing.
-

Best Team Archetypes

Mix → Kill

Why It Works

- Kid Buu creates the opening.
- Teammates convert it into damage.

Example Teams

- Kid Buu / Adult Gohan / Tien
 - Kid Buu / DBS Broly / Base Goku
-

Pressure → Snowball

Why It Works

- Every successful mixup creates another offensive opportunity.
- Opponents struggle to escape momentum.

Example Teams

- Blue Vegeta / Kid Buu / Janemba
 - Cell / Kid Buu / Base Goku
-

Win Conditions

Primary Win Condition

- Force defensive mistakes through layered offense.

Secondary Win Condition

- Use lockdown assists to create team-wide pressure.

Late-Game Win Condition

- Maintain offensive momentum until opponents crack.
-

Team Building Questions

Kid Buu Wants Teammates Who...

- Benefit from lockdown.
- Reward successful mix.
- Capitalize on offensive momentum.

Kid Buu Struggles To Provide...

- Resource generation.
- Dedicated support utility outside offense.
- Defensive utility.

Before Adding Kid Buu Ask:

- Does my team benefit from stronger mix?
 - Does my point character use lockdown well?
 - Do I want to build around offense?
-

Summary

Why Pick Kid Buu?

- Elite mix.

- Incredible assist value.
- Strong offensive synergy.

Why Avoid Kid Buu?

- Team needs stronger neutral control.
- Team lacks damage conversion.

Final Verdict

- One of DBFZ's premier offensive enablers, capable of transforming good pressure into overwhelming pressure.

MAJIN BUU

Character Identity

Primary Roles

- Trapplay
- Setplay
- Point

Team Archetypes

- Setplay
- Mix
- Technical
- Snowball

One-Sentence Summary

- A trap-oriented character that uses unique setups and delayed threats to create offensive situations unlike any other character in DBFZ.

What This Character Contributes

Damage

- Good damage.
- Excellent reward from successful setups.
- Strong corner pressure conversions.

Neutral

- Unusual.
- Relies on movement and setup opportunities.
- Less focused on direct confrontation.

Mix

- Exceptional.
- Forces opponents into unfamiliar defensive situations.
- Rewards preparation and creativity.

Support

- Strong offensive utility.
- Excellent synergy with setup-oriented teams.

Resource Economy

- Efficient.
- Converts resources into stronger offensive situations.

Team Placement

Point

- Viable: Excellent

Why

- Uses assists to establish offense.
- Gains maximum value from setup opportunities.

Mid

- Viable: Good

Why

- Maintains offensive momentum.

Anchor

- Viable: Situational

Why

- Loses some setup potential without assists.

Preferred Position

- Point

Explanation

- Majin Buu is strongest when he can establish offensive situations before resources and assists disappear.
-

Assist Analysis

A Assist

Provides

- Offensive utility.
- Combo support.
- Pressure extensions.

B Assist

Provides

- Setup utility.
- Specialized team support.

C Assist

Provides

- Easy confirms.
 - Fullscreen conversions.
-

DHC Synergy

Characters That Love DHCing Into Majin Buu

- Battery characters.
- Neutral specialists.

Why

- Majin Buu transforms momentum into setup opportunities.
-

Characters Majin Buu Loves DHCing Into

- Cashout characters.
- Strong anchors.

Why

- Maximizes reward after successful setups.
-

Special DHC Interactions

Fat Toss Setups

- Defining aspect of the character.
- Creates offensive situations unique to Majin Buu.

Trap Sequences

- Allows teams to create layered pressure over time.
-

Best Team Archetypes

Setup → Cashout

Why It Works

- Majin Buu creates the opening.
- Teammates secure the reward.

Example Teams

- Majin Buu / DBS Broly / Tien
 - Majin Buu / Base Goku / Janemba
-

Trapplay → Snowball

Why It Works

- Successful setups create additional setups.
- Opponents struggle to regain control.

Example Teams

- Majin Buu / Adult Gohan / Tien
 - Majin Buu / Kid Buu / Base Goku
-

Win Conditions

Primary Win Condition

- Establish traps and force defensive errors.

Secondary Win Condition

- Create layered offensive situations.

Late-Game Win Condition

- Overwhelm opponents through setup knowledge and pressure.

Team Building Questions

Majin Buu Wants Teammates Who...

- Benefit from setup opportunities.
- Reward successful pressure.
- Appreciate offensive utility.

Majin Buu Struggles To Provide...

- Simple gameplans.
- Straightforward neutral.
- Easy execution.

Before Adding Majin Buu Ask:

- Does my team support setplay?
- Can my team capitalize on traps?
- Am I comfortable with technical setups?

Summary

Why Pick Majin Buu?

- Unique setup game.
- Strong pressure.
- Excellent creativity potential.

Why Avoid Majin Buu?

- Team wants simplicity.
- Team lacks setup support.

Final Verdict

- A trapplay specialist capable of creating some of the strangest and most oppressive offensive situations in DBFZ.

NAPPA

Character Identity

Primary Roles

- Summoner
- Setplay
- Point

Team Archetypes

- Setplay
- Snowball
- Resource-Based
- Control

One-Sentence Summary

- A summon-focused character that uses Saibamen to create overwhelming offensive situations and transform single openings into extended momentum.
-

What This Character Contributes

Damage

- Strong damage.
- Excellent reward after successful setups.
- Converts momentum into devastating sequences.

Neutral

- Functional.
- Wants to establish Saibamen as quickly as possible.
- Neutral becomes significantly stronger once summons are active.

Mix

- Elite.
- Saibamen create layered offensive situations.
- Forces opponents into difficult defensive decisions.

Support

- Good assists.
- Strong offensive utility.
- Creates opportunities for teammates through pressure.

Resource Economy

- Efficient.

- Gains enormous value from successful summon setups.
 - Rewards long offensive sequences.
-

Team Placement

Point

- Viable: Excellent

Why

- Maximum access to assists.
- Easier summon protection.
- Establishes team momentum.

Mid

- Viable: Good

Why

- Can enter with resources available.

Anchor

- Viable: Weak

Why

- Loses summon protection.
- Harder to establish offense alone.

Preferred Position

- Point

Explanation

- Nappa is strongest when teammates help him establish and protect Saibamen.
-

Assist Analysis

A Assist

Provides

- Pressure support.
- Combo utility.
- Offensive extensions.

B Assist

Provides

- Setup utility.
- Team pressure support.

C Assist

Provides

- Easy confirms.
 - Long-range conversions.
-

DHC Synergy

Characters That Love DHCing Into Nappa

- Battery characters.
- Neutral specialists.

Why

- Nappa converts momentum into summon pressure.
-

Characters Nappa Loves DHCing Into

- Cashout characters.
- Strong anchors.

Why

- Maximizes reward after successful Saibaman pressure.
-

Special DHC Interactions

Saibamen

- Defining mechanic of the character.
- Creates offensive situations no other character can replicate.

Summon Momentum

- A single successful setup can completely alter the pace of the match.
-

Best Team Archetypes

Summon → Cashout

Why It Works

- Nappa creates the opening.
- Teammates secure the kill.

Example Teams

- Nappa / DBS Broly / Tien
 - Nappa / Base Goku / Janemba
-

Snowball → Snowball

Why It Works

- Once Nappa gains momentum, it becomes increasingly difficult for opponents to recover.

Example Teams

- Nappa / Adult Gohan / Tien
 - Nappa / Frieza / Base Goku
-

Win Conditions

Primary Win Condition

- Establish Saibamen.

Secondary Win Condition

- Convert successful setups into extended pressure.

Late-Game Win Condition

- Overwhelm opponents through summon control and momentum.
-

Team Building Questions

Nappa Wants Teammates Who...

- Protect summons.
- Generate momentum.
- Reward successful setups.

Nappa Struggles To Provide...

- Immediate pressure.
- Strong solo play.
- Flexible team support.

Before Adding Nappa Ask:

- Can my team protect Saibamen?
 - Can my team capitalize on setplay?
 - Does my team support snowball strategies?
-

Summary

Why Pick Nappa?

- Unique summon mechanics.
- Incredible snowball potential.
- Elite setplay.

Why Avoid Nappa?

- Team lacks support.
- Team needs a stronger anchor.

Final Verdict

- A summon specialist whose ability to create momentum through Saibamen makes him one of the most unique offensive characters in DBFZ.

CAPTAIN GINYU

Character Identity

Primary Roles

- Commander
- Summoner
- Point

Team Archetypes

- Setplay
- Control
- Snowball
- Technical

One-Sentence Summary

- A summon-based specialist that controls the battlefield through the Ginyu Force, creating layered situations that grow stronger over time.
-

What This Character Contributes

Damage

- Strong damage.
- Excellent reward after successful setups.
- Converts momentum into extended pressure sequences.

Neutral

- Unusual.
- Becomes significantly stronger once Ginyu Force members are active.
- Controls space through delayed threats.

Mix

- Strong.
- Ginyu Force calls create layered offensive situations.
- Difficult for opponents to track every threat.

Support

- Strong offensive utility.
- Creates opportunities through battlefield control.
- Offers unique team structures.

Resource Economy

- Efficient.
- Gains enormous value from successful setup sequences.
- Rewards planning ahead.

Team Placement

Point

- Viable: Excellent

Why

- Maximum access to assists.
- Easier to establish Ginyu Force pressure.
- Benefits greatly from team support.

Mid

- Viable: Situational

Why

- Can enter with resources.
- Harder to establish long-term control.

Anchor

- Viable: Weak

Why

- Loses much of his setup potential.
- Requires support to fully function.

Preferred Position

- Point

Explanation

- Ginyu wants the most resources, assists, and opportunities possible to establish his gameplan.
-

Assist Analysis

A Assist

Provides

- Pressure support.
- Combo extensions.
- Offensive utility.

B Assist

Provides

- Neutral utility.
- Team support.

C Assist

Provides

- Easy confirms.
 - Fullscreen conversions.
-

DHC Synergy

Characters That Love DHCing Into Ginyu

- Neutral specialists.
- Battery characters.

Why

- Ginyu transforms momentum into battlefield control.
-

Characters Ginyu Loves DHCing Into

- Cashout characters.
- Strong anchors.

Why

- Maximizes reward after successful Ginyu Force pressure.
-

Special DHC Interactions

Ginyu Force Calls

- Defining mechanic of the character.
- Creates delayed threats that remain active while Ginyu continues offense.

Battlefield Control

- Opponents must constantly track multiple threats simultaneously.
-

Best Team Archetypes

Commander → Cashout

Why It Works

- Ginyu creates opportunities.
- Teammates secure kills.

Example Teams

- Ginyu / DBS Broly / Tien
 - Ginyu / Base Goku / Janemba
-

Setup → Snowball

Why It Works

- Every successful sequence creates additional pressure.
- Opponents struggle to regain control.

Example Teams

- Ginyu / Adult Gohan / Tien
 - Ginyu / Frieza / Base Goku
-

Win Conditions

Primary Win Condition

- Establish Ginyu Force pressure.

Secondary Win Condition

- Control the battlefield through layered threats.

Late-Game Win Condition

- Overwhelm opponents through accumulated pressure and chaos.
-

Team Building Questions

Ginyu Wants Teammates Who...

- Protect his setups.
- Generate momentum.
- Reward successful pressure.

Ginyu Struggles To Provide...

- Simple gameplans.
- Strong solo play.
- Immediate offense.

Before Adding Ginyu Ask:

- Can my team support setup-heavy characters?
 - Can I maintain momentum once pressure starts?
 - Am I comfortable managing multiple threats?
-

Summary

Why Pick Ginyu?

- Unique battlefield control.
- Incredible snowball potential.
- One-of-a-kind pressure structures.

Why Avoid Ginyu?

- Team lacks support.
- Team wants a simpler gameplan.

Final Verdict

- A commander-style specialist that turns the Ginyu Force into a second team, overwhelming opponents through layered pressure and battlefield control.

HIT

Character Identity

Primary Roles

- Punisher
- Neutral
- Anchor

Team Archetypes

- Neutral
- Control
- Fundamentals
- Counterplay

One-Sentence Summary

- A counterplay-focused character that dominates interactions through whiff punishment, space control, and forcing opponents to respect every decision.

What This Character Contributes

Damage

- Excellent.
- Strong reward from successful reads.
- Converts mistakes into devastating damage.

Neutral

- Elite.
- Controls space unlike any other character.
- Forces opponents to think before committing.

Mix

- Limited.
- Relies on conditioning and neutral dominance rather than layered offense.

Support

- Useful assists.
- Primarily contributes through his own strength.

Resource Economy

- Efficient.
- Doesn't require large amounts of meter.
- Gains strong reward from available resources.

Team Placement

Point

- Viable: Good

Why

- Uses assists effectively.
- Establishes neutral control.

Mid

- Viable: Excellent

Why

- Strong independent value.
- Can capitalize on momentum.

Anchor

- Viable: Excellent

Why

- Strong solo neutral.
- Excellent comeback potential.
- Difficult to challenge directly.

Preferred Position

- Mid / Anchor

Explanation

- Hit's value comes from his ability to function independently and punish mistakes regardless of team state.
-

Assist Analysis

A Assist

Provides

- Neutral support.
- Combo utility.
- Space control.

B Assist

Provides

- Pressure support.
- Utility.

C Assist

Provides

- Easy confirms.
 - Long-range conversions.
-

DHC Synergy

Characters That Love DHCing Into Hit

- Neutral-focused characters.
- Battery characters.

Why

- Hit converts momentum into controlled offense.
-

Characters Hit Loves DHCing Into

- Cashout characters.
- Strong finishers.

Why

- Maximizes reward after successful reads.
-

Special DHC Interactions

Time Skip Movement

- Defines how opponents approach neutral.
- Creates threat ranges unavailable to the rest of the cast.

Counterplay Pressure

- Forces opponents to constantly consider risk versus reward.
-

Best Team Archetypes

Neutral → Punish

Why It Works

- Hit forces mistakes.
- Teammates capitalize on the resulting opportunities.

Example Teams

- Hit / Adult Gohan / Tien
 - Hit / Janemba / Base Goku
-

Control → Cashout

Why It Works

- Opponents are forced into mistakes.
- Team converts mistakes into kills.

Example Teams

- Hit / Frieza / Tien
 - Hit / Cell / Base Goku
-

Win Conditions

Primary Win Condition

- Punish mistakes.

Secondary Win Condition

- Control interactions through superior neutral.

Late-Game Win Condition

- Leverage solo strength and strong punishment tools.

Team Building Questions

Hit Wants Teammates Who...

- Benefit from strong neutral.
- Reward successful reads.
- Appreciate stable assists.

Hit Struggles To Provide...

- Elite mix.
- Setplay.
- Heavy offensive support.

Before Adding Hit Ask:

- Does my team need stronger neutral?
- Does my team need a better anchor?
- Can my team capitalize on forced mistakes?

Summary

Why Pick Hit?

- Elite punishment.
- Strong neutral.
- Excellent solo value.

Why Avoid Hit?

- Team needs mix.
- Team needs offensive support.

Final Verdict

- A punishment specialist that turns every opponent mistake into a potential round-ending opportunity.

GOKU BLACK

Character Identity

Primary Roles

- Stabilizer
- Neutral
- Mid

Team Archetypes

- Control
- Fundamentals
- Balanced
- Neutral

One-Sentence Summary

- A neutral-focused character that provides stability, consistency, and reliable support while fitting comfortably into a wide variety of team compositions.
-

What This Character Contributes

Damage

- Solid damage.
- Consistent conversions.
- Good reward from common situations.

Neutral

- Excellent.
- Strong ki blast game.
- Controls space effectively.
- Difficult to challenge recklessly.

Mix

- Functional.
- Relies more on strong fundamentals than overwhelming offense.

Support

- Strong assists.
- Easy team integration.
- Helps stabilize team structures.

Resource Economy

- Efficient.

- Doesn't require heavy investment.
 - Consistently converts available resources.
-

Team Placement

Point

- Viable: Good

Why

- Strong neutral.
- Uses assists effectively.

Mid

- Viable: Excellent

Why

- Provides support while remaining independently strong.

Anchor

- Viable: Good

Why

- Strong solo neutral.
- Lacks some dedicated anchor win conditions.

Preferred Position

- Mid

Explanation

- Goku Black is most valuable when supporting teammates while maintaining strong neutral presence.
-

Assist Analysis

A Assist

Provides

- Neutral control.
- Combo extensions.
- Space management.

Best Partners

- Rushdown characters.
 - Mix-focused teams.
 - Characters that need help approaching.
-

B Assist

Provides

- Utility.
- Pressure support.

Best Partners

- Balanced teams.
-

C Assist

Provides

- Easy confirms.

Drawbacks

- Long cooldown.
-

DHC Synergy

Characters That Love DHCing Into Goku Black

- Point characters.
- Neutral-focused characters.

Why

- Goku Black maintains stability and positioning.
-

Characters Goku Black Loves DHCing Into

- Cashout characters.
- Dedicated anchors.

Why

- Maximizes team reward after successful neutral wins.
-

Special DHC Interactions

Beam Control

- One of the strongest reasons to pick Goku Black.
- Helps many characters establish offense safely.

Reliable Structure

- Rarely conflicts with team gameplans.
 - Fits naturally into most shells.
-

Best Team Archetypes

Neutral → Cashout

Why It Works

- Goku Black wins space.
- Teammates convert that advantage into damage.

Example Teams

- Goku Black / DBS Broly / Tien
 - Goku Black / Adult Gohan / Base Goku
-

Balanced Core

Why It Works

- Covers weaknesses.
- Creates stable team structures.

Example Teams

- Goku Black / Cell / Yamcha
 - Goku Black / Janemba / Base Goku
-

Win Conditions

Primary Win Condition

- Win neutral consistently.

Secondary Win Condition

- Support stronger offensive teammates.

Late-Game Win Condition

- Leverage strong fundamentals and positioning.
-

Team Building Questions

Goku Black Wants Teammates Who...

- Reward neutral wins.
- Appreciate support.
- Benefit from stable assists.

Goku Black Struggles To Provide...

- Elite mix.
- Massive cashout.
- Specialized utility.

Before Adding Goku Black Ask:

- Does my team need stability?
 - Does my team need stronger neutral?
 - Does my team benefit from beam support?
-

Summary

Why Pick Goku Black?

- Strong neutral.
- Easy synergy.
- Reliable support.

Why Avoid Goku Black?

- Team needs a specialist.
- Team requires a stronger win condition.

Final Verdict

- A stabilizing force that strengthens team consistency through strong neutral, reliable assists, and flexible positioning.

ANDROID 21

Character Identity

Primary Roles

- Toolbox
- Neutral
- Mid

Team Archetypes

- Balanced
- Control
- Fundamentals
- Flex

One-Sentence Summary

- A versatile character with answers for nearly every situation, providing strong neutral, reliable pressure, and exceptional team flexibility.
-

What This Character Contributes

Damage

- Strong damage.
- Excellent conversions.
- Consistent reward across game states.

Neutral

- Excellent.
- Strong movement.
- Effective projectile control.
- Comfortable at multiple ranges.

Mix

- Strong.
- Reliable pressure structure.
- Can threaten opponents without relying on gimmicks.

Support

- Excellent assists.

- Strong team integration.
- Rarely creates team-building conflicts.

Resource Economy

- Efficient.
 - Uses resources effectively.
 - Functions well regardless of team economy.
-

Team Placement

Point

- Viable: Excellent

Why

- Uses assists effectively.
- Establishes momentum early.

Mid

- Viable: Excellent

Why

- Provides support while remaining dangerous herself.

Anchor

- Viable: Good

Why

- Strong solo neutral.
- Lacks some dedicated anchor mechanics.

Preferred Position

- Point / Mid

Explanation

- Android 21's flexibility allows her to fit into nearly any team structure while maintaining strong individual performance.
-

Assist Analysis

A Assist

Provides

- Neutral support.
- Combo extensions.
- Team utility.

Best Partners

- Rushdown teams.
 - Balanced teams.
 - Neutral-focused teams.
-

B Assist

Provides

- Utility.
- Pressure support.

Best Partners

- Teams seeking flexibility.
-

C Assist

Provides

- Easy confirms.
- Long-range conversions.

Drawbacks

- Long cooldown.
-

DHC Synergy

Characters That Love DHCing Into Android 21

- Point characters.
- Neutral specialists.

Why

- Android 21 maintains momentum and screen control.
-

Characters Android 21 Loves DHCing Into

- Cashout characters.

- Strong anchors.

Why

- Maximizes team reward after successful neutral wins.
-

Special DHC Interactions

Versatility

- One of Android 21's greatest strengths.
- Can fill multiple team needs simultaneously.

Team Compatibility

- Rarely requires a team to be built around her.
 - Often improves existing team structures naturally.
-

Best Team Archetypes

Balanced Core

Why It Works

- Android 21 covers weaknesses naturally.
- Functions effectively in nearly every matchup.

Example Teams

- Android 21 / Cell / Base Goku
 - Android 21 / Janemba / Tien
-

Neutral → Cashout

Why It Works

- Android 21 creates opportunities.
- Teammates maximize reward.

Example Teams

- Android 21 / DBS Broly / Tien
 - Android 21 / Frieza / Base Goku
-

Win Conditions

Primary Win Condition

- Win neutral consistently.

Secondary Win Condition

- Adapt to the needs of the match.

Late-Game Win Condition

- Leverage versatility and strong fundamentals.
-

Team Building Questions

Android 21 Wants Teammates Who...

- Reward consistency.
- Appreciate support.
- Benefit from strong neutral.

Android 21 Struggles To Provide...

- Extreme specialization.
- Unique team win conditions.
- Dedicated setplay.

Before Adding Android 21 Ask:

- Does my team need flexibility?
 - Does my team need stronger neutral?
 - Does my team value consistency?
-

Summary

Why Pick Android 21?

- Incredible versatility.
- Strong neutral.
- Easy synergy.

Why Avoid Android 21?

- Team needs a specialist.
- Team already has a similar role covered.

Final Verdict

- A toolbox character capable of solving multiple team-building problems at once while maintaining strong performance in every phase of the game.

BEERUS

Character Identity

Primary Roles

- Architect
- Setplay
- Mid

Team Archetypes

- Setplay
- Control
- Technical
- Snowball

One-Sentence Summary

- A setup-oriented character that uses orbs to construct offensive situations, control space, and create pressure sequences unlike any other character in DBFZ.
-

What This Character Contributes

Damage

- Excellent damage.
- Strong corner reward.
- High optimization potential.

Neutral

- Strong.
- Unique orb control.
- Dominates specific screen spaces.
- Rewards proactive positioning.

Mix

- Excellent.
- Orbs create layered pressure.
- Forces opponents into difficult defensive decisions.

Support

- Strong assists.

- Provides unique pressure tools.
- Enables technical team structures.

Resource Economy

- Efficient.
 - Gains significant value from resources.
 - Converts momentum into stronger setups.
-

Team Placement

Point

- Viable: Excellent

Why

- Uses assists extremely well.
- Establishes orb pressure early.

Mid

- Viable: Excellent

Why

- Maintains offensive structures.
- Strong support value.

Anchor

- Viable: Situational

Why

- Strong solo.
- Loses some setup layers without assists.

Preferred Position

- Point / Mid

Explanation

- Beerus gains the most value when supported by assists that help establish and maintain orb control.
-

Assist Analysis

A Assist

Provides

- Neutral utility.
- Orb support.
- Combo extensions.

B Assist

Provides

- Pressure support.
- Offensive utility.

C Assist

Provides

- Easy confirms.
 - Fullscreen conversions.
-

DHC Synergy

Characters That Love DHCing Into Beerus

- Neutral specialists.
- Battery characters.

Why

- Beerus converts momentum into orb pressure.
-

Characters Beerus Loves DHCing Into

- Cashout characters.
- Strong anchors.

Why

- Maximizes reward after successful setups.
-

Special DHC Interactions

Orb Control

- Defines the character.
- Creates offensive situations unavailable to the rest of the roster.

Screen Architecture

- Beerus actively reshapes how neutral and pressure are played.
-

Best Team Archetypes

Setup → Cashout

Why It Works

- Beerus creates the opening.
- Teammates secure the kill.

Example Teams

- Beerus / DBS Broly / Tien
 - Beerus / Base Goku / Janemba
-

Control → Snowball

Why It Works

- Orb pressure compounds over time.
- Opponents struggle to escape established setups.

Example Teams

- Beerus / Adult Gohan / Tien
 - Beerus / Frieza / Base Goku
-

Win Conditions

Primary Win Condition

- Establish orb control.

Secondary Win Condition

- Convert setups into pressure.

Late-Game Win Condition

- Overwhelm opponents through layered orb sequences.
-

Team Building Questions

Beerus Wants Teammates Who...

- Protect setups.
- Reward successful pressure.

- Appreciate technical gameplans.

Beerus Struggles To Provide...

- Simple gameplans.
- Immediate offense.
- Straightforward neutral.

Before Adding Beerus Ask:

- Can my team support setup characters?
 - Do I benefit from orb pressure?
 - Am I comfortable with technical execution?
-

Summary

Why Pick Beerus?

- Unique orb mechanics.
- Elite setup potential.
- Strong offensive creativity.

Why Avoid Beerus?

- Team wants simplicity.
- Team lacks setup support.

Final Verdict

- A technical architect that constructs offensive situations through orb control, rewarding creativity and preparation with devastating pressure.

BROLY (DBZ)

Character Identity

Primary Roles

- Bully
- Control
- Anchor

Team Archetypes

- Control

- Pressure
- Attrition
- Comeback

One-Sentence Summary

- A pressure-focused powerhouse that dominates space through armor, oppressive normals, and constant threat generation.
-

What This Character Contributes

Damage

- Excellent damage.
- Strong corner reward.
- Converts mistakes into significant momentum.

Neutral

- Exceptional.
- Large hitboxes.
- Armor-based interactions.
- Forces opponents to respect his space.

Mix

- Strong.
- Strike/throw pressure.
- Difficult to challenge once offense begins.

Support

- Strong assists.
- Excellent neutral utility.
- Helps teams establish screen control.

Resource Economy

- Efficient.
 - Doesn't require excessive resources.
 - Gains tremendous value from available meter.
-

Team Placement

Point

- Viable: Good

Why

- Uses assists effectively.
- Establishes screen control early.

Mid

- Viable: Excellent

Why

- Strong transition character.
- Maintains pressure.

Anchor

- Viable: Excellent

Why

- Strong solo neutral.
- Excellent comeback potential.
- Difficult to challenge directly.

Preferred Position

- Mid / Anchor

Explanation

- Broly's ability to function independently makes him valuable even when teammates are gone.
-

Assist Analysis**A Assist****Provides**

- Neutral control.
- Space denial.
- Combo extensions.

B Assist**Provides**

- Pressure support.

- Offensive utility.

C Assist

Provides

- Easy confirms.
 - Fullscreen conversions.
-

DHC Synergy

Characters That Love DHCing Into Broly

- Neutral-focused characters.
- Pressure characters.

Why

- Broly turns momentum into oppressive screen control.
-

Characters Broly Loves DHCing Into

- Cashout characters.
- Dedicated finishers.

Why

- Maximizes reward after successful pressure.
-

Special DHC Interactions

Armor

- One of Broly's defining mechanics.
- Forces opponents to play around favorable interactions.

Space Control

- Allows Broly to dominate specific areas of the screen.
-

Best Team Archetypes

Control → Cashout

Why It Works

- Broly forces mistakes.
- Teammates maximize reward.

Example Teams

- Broly / Adult Gohan / Tien
 - Broly / Base Goku / Janemba
-

Attrition → Win Condition

Why It Works

- Opponents gradually lose options.
- Broly becomes increasingly difficult to stop.

Example Teams

- Frieza / Broly / Tien
 - Beerus / Broly / Base Goku
-

Win Conditions

Primary Win Condition

- Control space and force unfavorable interactions.

Secondary Win Condition

- Overwhelm opponents through armor and pressure.

Late-Game Win Condition

- Leverage strong solo presence and comeback potential.
-

Team Building Questions

Broly Wants Teammates Who...

- Benefit from strong neutral.
- Appreciate screen control.
- Reward successful pressure.

Broly Struggles To Provide...

- Extreme mobility.
- Technical setups.
- Resource generation.

Before Adding Broly Ask:

- Does my team need stronger neutral?

- Does my team need a stronger anchor?
 - Can my team capitalize on forced mistakes?
-

Summary

Why Pick Broly?

- Elite screen control.
- Strong armor.
- Excellent anchor value.

Why Avoid Broly?

- Team needs mobility.
- Team wants technical setups.

Final Verdict

- A bullying powerhouse that forces opponents into uncomfortable situations through armor, space control, and relentless pressure.

BARDOCK

Character Identity

Primary Roles

- Momentum
- Point
- Pressure

Team Archetypes

- Rushdown
- Pressure
- Fundamentals
- Snowball

One-Sentence Summary

- A momentum-focused point character that excels at turning neutral wins into relentless pressure and maintaining offensive control.
-

What This Character Contributes

Damage

- Solid damage.
- Consistent conversions.
- Strong corner carry.

Neutral

- Excellent.
- Strong movement.
- Reliable buttons.
- Wins interactions through consistency.

Mix

- Strong.
- Effective pressure structure.
- Creates repeated offensive opportunities.

Support

- Good assists.
- Easy integration into team compositions.
- Supports aggressive gameplans.

Resource Economy

- Efficient.
- Doesn't require large investments.
- Converts resources effectively.

Team Placement

Point

- Viable: Excellent

Why

- Uses assists extremely well.
- Establishes momentum early.
- Creates offensive opportunities consistently.

Mid

- Viable: Good

Why

- Maintains pressure.
- Provides useful support.

Anchor

- Viable: Situational

Why

- Functional solo.
- Stronger with assists.

Preferred Position

- Point

Explanation

- Bardock is at his best when he can establish offensive momentum before the rest of the team enters the match.
-

Assist Analysis

A Assist

Provides

- Neutral support.
- Combo extensions.
- Pressure utility.

B Assist

Provides

- Offensive support.
- Utility.

Characters That Love DHCing Into Bardock

- Neutral-focused characters.
- Battery characters.

Why

- Bardock maintains offensive momentum extremely well.
-

Characters Bardock Loves DHCing Into

- Cashout characters.
- Strong anchors.

Why

- Maximizes reward after successful offense.
-

Special DHC Interactions

Momentum Retention

- One of Bardock's defining strengths.
- Teams rarely lose offensive tempo when Bardock is involved.

Simple Effectiveness

- Creates value without requiring complicated setups.
-

Best Team Archetypes

Momentum → Cashout

Why It Works

- Bardock creates opportunities.
- Teammates maximize reward.

Example Teams

- Bardock / Adult Gohan / Tien
 - Bardock / DBS Broly / Base Goku
-

Rushdown Core

Why It Works

- Constant offensive pressure.
- Difficult for opponents to stabilize neutral.

Example Teams

- Bardock / Android 18 / Yamcha
 - Bardock / Kid Buu / Tien
-

Win Conditions

Primary Win Condition

- Maintain offensive momentum.

Secondary Win Condition

- Force defensive mistakes through pressure.

Late-Game Win Condition

- Continue converting neutral wins into offense.
-

Team Building Questions

Bardock Wants Teammates Who...

- Benefit from pressure.
- Reward offensive momentum.
- Appreciate reliable assists.

Bardock Struggles To Provide...

- Elite setplay.
- Unique utility.
- Specialized team support.

Before Adding Bardock Ask:

- Does my team want stronger offense?
 - Does my team need a reliable point?
 - Does my team reward momentum?
-

Summary

Why Pick Bardock?

- Excellent pressure.
- Strong momentum.
- Reliable point value.

Why Avoid Bardock?

- Team needs a specialist.
- Team requires stronger utility.

Final Verdict

- A momentum-focused point character that excels at keeping offensive pressure active and creating opportunities for the rest of the team.

ZAMASU

Character Identity

Primary Roles

- Ascender
- Setplay
- Mid

Team Archetypes

- Setplay
- Control
- Technical
- Snowball

One-Sentence Summary

- A technical powerhouse that transforms successful openings into extended offensive sequences, overwhelming opponents through flight, setup pressure, and escalating momentum.

What This Character Contributes

Damage

- Excellent damage.
- Exceptional optimization potential.
- Massive reward from prepared setups.

Neutral

- Unique.
- Flight creates angles unavailable to most of the cast.

- Controls space in unconventional ways.

Mix

- Elite.
- Flight pressure and setups create layered offensive situations.
- Difficult for opponents to defend consistently.

Support

- Strong assists.
- Excellent offensive utility.
- Rewards teams willing to play around his strengths.

Resource Economy

- Efficient.
 - Gains enormous value from meter investment.
 - Converts resources into extended offensive sequences.
-

Team Placement

Point

- Viable: Good

Why

- Uses assists well.
- Can establish pressure early.

Mid

- Viable: Excellent

Why

- Often enters with resources available.
- Maximizes setup potential.

Anchor

- Viable: Situational

Why

- Strong solo offense.
- Loses access to some team-dependent setups.

Preferred Position

- Mid

Explanation

- Zamasu thrives when teammates help him establish momentum before he enters the match.

Assist Analysis

A Assist

Provides

- Pressure support.
- Combo extensions.
- Offensive utility.

B Assist

Provides

- Neutral utility.
- Team support.

C Assist

Provides

- Easy confirms.
- Fullscreen conversions.

DHC Synergy

Characters That Love DHCing Into Zamasu

- Battery characters.
- Neutral specialists.

Why

- Zamasu converts momentum into terrifying setup situations.

Characters Zamasu Loves DHCing Into

- Cashout characters.
- Strong anchors.

Why

- Maximizes reward after successful pressure sequences.
-

Special DHC Interactions

Flight

- Defines the character.
- Creates pressure structures unavailable to the rest of the roster.

Blade Setups

- One of the strongest reasons to build around Zamasu.
 - Allows for extended offensive sequences and unique pressure.
-

Best Team Archetypes

Setup → Ascension

Why It Works

- Zamasu gains momentum.
- Offensive pressure becomes increasingly difficult to escape.

Example Teams

- Zamasu / Adult Gohan / Tien
 - Zamasu / DBS Broly / Base Goku
-

Control → Snowball

Why It Works

- Neutral creates opportunities.
- Zamasu transforms those opportunities into extended pressure.

Example Teams

- Frieza / Zamasu / Tien
 - Beerus / Zamasu / Janemba
-

Win Conditions

Primary Win Condition

- Establish flight pressure and setup structures.

Secondary Win Condition

- Convert successful openings into extended offensive sequences.

Late-Game Win Condition

- Overwhelm opponents through layered setups and resource conversion.
-

Team Building Questions

Zamasu Wants Teammates Who...

- Generate momentum.
- Protect setups.
- Reward long offensive sequences.

Zamasu Struggles To Provide...

- Simple gameplans.
- Immediate pressure.
- Easy execution.

Before Adding Zamasu Ask:

- Can my team support technical setups?
 - Can I capitalize on long sequences?
 - Am I comfortable managing complex pressure structures?
-

Summary

Why Pick Zamasu?

- Elite setup potential.
- Unique flight pressure.
- Incredible offensive reward.

Why Avoid Zamasu?

- Team wants simplicity.
- Team lacks setup support.

Final Verdict

- A technical ascender that transforms successful openings into increasingly oppressive offensive situations through flight, setups, and momentum.

VEGITO (SSGSS)

Character Identity

Primary Roles

- Dominator
- Neutral
- Point

Team Archetypes

- Neutral
- Pressure
- Fundamentals
- Snowball

One-Sentence Summary

- A neutral-dominating powerhouse that uses exceptional range, movement, and conversions to control the pace of the match and overwhelm opponents through superior screen presence.

What This Character Contributes

Damage

- Excellent damage.
- Outstanding corner carry.
- Strong reward from nearly every hit.

Neutral

- Elite.
- Massive buttons.
- Excellent movement.
- Controls space from ranges most characters cannot contest.

Mix

- Functional.
- Relies more on neutral wins than traditional mix structures.
- Creates pressure through advantage and positioning.

Support

- Strong assists.
- Useful neutral support.
- Easy integration into many team structures.

Resource Economy

- Efficient.
 - Strong meter build.
 - Excellent meter usage.
-

Team Placement

Point

- Viable: Excellent

Why

- Maximizes neutral dominance.
- Uses assists effectively.
- Establishes momentum immediately.

Mid

- Viable: Excellent

Why

- Maintains strong pressure.
- Excellent individual value.

Anchor

- Viable: Good

Why

- Strong solo neutral.
- Lacks some dedicated anchor mechanics.

Preferred Position

- Point

Explanation

- Vegito gains maximum value when he can abuse assists to convert his dominant neutral into offensive momentum.
-

Assist Analysis

A Assist

Provides

- Neutral support.
- Combo extensions.
- Space control.

B Assist

Provides

- Utility.
- Pressure support.

C Assist

Provides

- Easy confirms.

-

DHC Synergy

Characters That Love DHCing Into Vegito

- Battery characters.
- Neutral-focused characters.

Why

- Vegito maintains momentum while controlling space.
-

Characters Vegito Loves DHCing Into

- Cashout characters.
- Strong anchors.

Why

- Converts neutral wins into maximum reward.
-

Special DHC Interactions

Screen Control

- One of Vegito's defining strengths.

- Opponents must constantly respect his threat range.

Corner Carry

- Turns minor openings into major positioning advantages.
-

Best Team Archetypes

Neutral → Cashout

Why It Works

- Vegito wins interactions.
- Teammates maximize reward.

Example Teams

- Vegito / DBS Broly / Tien
 - Vegito / Base Goku / Janemba
-

Pressure Through Neutral

Why It Works

- Opponents struggle to contest Vegito's space.
- Offensive opportunities naturally emerge.

Example Teams

- Vegito / Adult Gohan / Tien
 - Vegito / Android 18 / Base Goku
-

Win Conditions

Primary Win Condition

- Dominate neutral.

Secondary Win Condition

- Convert screen control into pressure.

Late-Game Win Condition

- Leverage superior range and movement to outplay opponents.
-

Team Building Questions

Vegito Wants Teammates Who...

- Reward neutral wins.
- Capitalize on corner carry.
- Appreciate strong assists.

Vegito Struggles To Provide...

- Elite mix.
- Setup pressure.
- Specialized utility.

Before Adding Vegito Ask:

- Does my team need stronger neutral?
 - Does my team benefit from screen control?
 - Can my team capitalize on Vegito's conversions?
-

Summary

Why Pick Vegito?

- Elite neutral.
- Massive buttons.
- Strong conversions.

Why Avoid Vegito?

- Team needs mix.
- Team needs setup utility.

Final Verdict

- A neutral-dominating powerhouse capable of controlling the pace of the match through exceptional range, movement, and consistency.

JANEMBA

Character Identity

Primary Roles

- Gatekeeper
- Anchor
- Neutral

Team Archetypes

- Control
- Fundamentals
- Counterplay
- Neutral

One-Sentence Summary

- A defensive-neutral specialist that punishes poor positioning, controls space through unique tools, and forces opponents to respect every interaction.
-

What This Character Contributes

Damage

- Strong damage.
- Excellent conversions.
- High reward from successful reads.

Neutral

- Exceptional.
- Unique projectile control.
- Excellent screen coverage.
- Difficult to approach recklessly.

Mix

- Functional.
- Relies on conditioning and neutral dominance.
- Creates opportunities through threat rather than pure offense.

Support

- Excellent assists.
- Strong neutral utility.
- Fits naturally into many team structures.

Resource Economy

- Efficient.
- Doesn't require heavy meter investment.
- Gains strong reward from available resources.

Team Placement

Point

- Viable: Good

Why

- Uses assists effectively.
- Can establish neutral control.

Mid

- Viable: Excellent

Why

- Provides utility while remaining independently strong.

Anchor

- Viable: Excellent

Why

- Strong solo neutral.
- Excellent comeback potential.
- Difficult to challenge directly.

Preferred Position

- Anchor

Explanation

- Janemba thrives when opponents are forced to engage him in neutral repeatedly.
-

Assist Analysis

A Assist

Provides

- Neutral support.
- Space control.
- Combo utility.

B Assist

Provides

- Pressure support.

- Offensive utility.

C Assist

Provides

- Easy confirms.
 - Fullscreen conversions.
-

DHC Synergy

Characters That Love DHCing Into Janemba

- Point characters.
- Neutral specialists.

Why

- Janemba maintains screen control and momentum.
-

Characters Janemba Loves DHCing Into

- Cashout characters.
- Dedicated finishers.

Why

- Maximizes reward after successful neutral wins.
-

Special DHC Interactions

Teleportation

- Defines many of Janemba's neutral interactions.
- Creates threat ranges unavailable to most characters.

Counterplay Tools

- Forces opponents to think carefully about every decision.
-

Best Team Archetypes

Neutral → Punish

Why It Works

- Janemba forces mistakes.
- Teammates maximize reward.

Example Teams

- Janemba / Adult Gohan / Tien
 - Janemba / DBS Broly / Base Goku
-

Control Core

Why It Works

- Opponents struggle to establish offense.
- Team slowly accumulates advantages.

Example Teams

- Frieza / Janemba / Tien
 - Beerus / Janemba / Base Goku
-

Win Conditions

Primary Win Condition

- Control space and punish mistakes.

Secondary Win Condition

- Force opponents into predictable decisions.

Late-Game Win Condition

- Leverage strong solo neutral and defensive utility.
-

Team Building Questions

Janemba Wants Teammates Who...

- Reward neutral wins.
- Appreciate strong assists.
- Benefit from screen control.

Janemba Struggles To Provide...

- Elite mix.
- Extreme setplay.
- Resource generation.

Before Adding Janemba Ask:

- Does my team need a stronger anchor?

- Does my team need neutral control?
 - Can my team capitalize on forced mistakes?
-

Summary

Why Pick Janemba?

- Excellent anchor value.
- Strong neutral.
- Exceptional utility.

Why Avoid Janemba?

- Team needs stronger offense.
- Team needs dedicated mix.

Final Verdict

- A gatekeeper character that controls interactions through superior neutral, defensive utility, and the constant threat of punishment.

JIREN

Character Identity

Primary Roles

- Challenger
- Neutral
- Anchor

Team Archetypes

- Counterplay
- Fundamentals
- Control
- Neutral

One-Sentence Summary

- A counter-focused powerhouse that thrives on challenging opponents directly, turning reckless offense into devastating punishment.
-

What This Character Contributes

Damage

- Excellent damage.
- High reward from successful reads.
- Strong corner carry and conversion potential.

Neutral

- Strong.
- Controls key areas of the screen.
- Forces opponents to respect his threat range.

Mix

- Functional.
- Relies more on conditioning than layered offense.
- Creates opportunities through fear of punishment.

Support

- Useful assists.
- Strong utility for neutral-focused teams.

Resource Economy

- Efficient.
- Doesn't require heavy investment.
- Gains excellent reward from available meter.

Team Placement

Point

- Viable: Good

Why

- Uses assists effectively.
- Establishes strong neutral presence.

Mid

- Viable: Excellent

Why

- Strong individual value.
- Provides utility without requiring extensive support.

Anchor

- Viable: Excellent

Why

- Strong solo threat.
- Excellent comeback potential.
- Punishes mistakes consistently.

Preferred Position

- Mid / Anchor

Explanation

- Jiren becomes increasingly dangerous as teams shrink and neutral interactions become more important.
-

Assist Analysis

A Assist

Provides

- Neutral support.
- Combo extensions.
- Space control.

B Assist

Provides

- Utility.

- Battery characters.

Why

- Jiren converts momentum into control and punishment.
-

Characters Jiren Loves DHCing Into

- Cashout characters.
- Dedicated finishers.

Why

- Maximizes reward after successful reads.
-

Special DHC Interactions

Counter Mechanics

- Defining aspect of the character.
- Forces opponents to constantly consider risk.

Defensive Confidence

- Jiren excels when opponents become hesitant.
-

Best Team Archetypes

Neutral → Punish

Why It Works

- Jiren forces mistakes.
- Teammates maximize reward.

Example Teams

- Jiren / Adult Gohan / Tien
 - Jiren / DBS Broly / Base Goku
-

Fundamentals Core

Why It Works

- Team wins through strong decision-making.
- Opponents struggle to take unnecessary risks.

Example Teams

- Cell / Jiren / Tien

- Goku Black / Jiren / Janemba
-

Win Conditions

Primary Win Condition

- Punish overextension.

Secondary Win Condition

- Dominate neutral through confidence and control.

Late-Game Win Condition

- Leverage strong solo tools and superior punishment.
-

Team Building Questions

Jiren Wants Teammates Who...

- Reward neutral wins.
- Appreciate strong assists.
- Benefit from controlled pacing.

Jiren Struggles To Provide...

- Elite mix.
- Complex setplay.
- Resource generation.

Before Adding Jiren Ask:

- Does my team need a stronger anchor?
 - Does my team reward successful reads?
 - Can my team capitalize on mistakes?
-

Summary

Why Pick Jiren?

- Strong punishment.
- Excellent anchor value.
- Reliable neutral.

Why Avoid Jiren?

- Team needs stronger mix.

- Team wants heavy setplay.

Final Verdict

- A challenger-style powerhouse that thrives on forcing opponents to second-guess their decisions and punishing mistakes with overwhelming efficiency.

VIDEL

Character Identity

Primary Roles

- Disruptor
- Mix
- Point

Team Archetypes

- Mix
- Rushdown
- Pressure
- Technical

One-Sentence Summary

- A disruption-focused point character that overwhelms opponents through unconventional offense, strong pressure, and constant defensive uncertainty.

What This Character Contributes

Damage

- Good damage.
- Strong corner reward.
- Excellent momentum from successful openings.

Neutral

- Mobile.
- Unusual movement options.
- Difficult to predict.

Mix

- Excellent.

- Forces opponents into unfamiliar defensive situations.
- Creates pressure through unpredictability.

Support

- Supports pressure-focused teams well.

Resource Economy

- Efficient.
 - Gains tremendous value from successful pressure.
 - Rewards optimization.
-

Team Placement

Point

- Viable: Excellent

Why

- Uses assists extremely well.

- Establishes pressure quickly.

Mid

- Viable: Excellent

Why

- Maintains offensive momentum.
- Provides strong utility.

Anchor

- Viable: Situational

Why

- Dangerous solo.
- Loses some pressure layers without assists.

Preferred Position

- Point / Mid

Explanation

- Android 17 thrives when he can continuously pressure opponents and force interactions on his terms.

Assist Analysis

A Assist

Provides

- Pressure support.
- Combo extensions.
- Offensive utility.

B Assist

Provides

- Utility.
- Pressure reinforcement.

C Assist

Provides

- Easy confirms.
- Fullscreen conversions.

DHC Synergy

Characters That Love DHCing Into Android 17

- Neutral specialists.
- Battery characters.

Why

- Android 17 converts momentum into relentless pressure.

Characters Android 17 Loves DHCing Into

- Cashout characters.
- Strong anchors.

Why

- Maximizes reward after successful offense.

Special DHC Interactions

Barrier

- Defining mechanic of the character.
- Allows Android 17 to challenge situations most characters cannot.

Rekka Pressure

- Creates offensive sequences that continuously threaten momentum shifts.

Best Team Archetypes

Pressure → Cashout

Why It Works

- Android 17 creates openings.
- Teammates secure kills.

Example Teams

- Android 17 / DBS Broly / Tien
- Android 17 / Base Goku / Janemba

Momentum → Snowball

Why It Works

- Every successful sequence creates additional pressure.
- Opponents struggle to regain control.

Example Teams

- Android 17 / Adult Gohan / Tien
 - Android 17 / Kid Buu / Base Goku
-

Win Conditions

Primary Win Condition

- Maintain offensive momentum.

Secondary Win Condition

- Steal turns through barrier and pressure.

Late-Game Win Condition

- Overwhelm opponents through optimized offense and conditioning.
-

Team Building Questions

Android 17 Wants Teammates Who...

- Reward pressure.
- Appreciate offensive assists.
- Capitalize on momentum.

Android 17 Struggles To Provide...

- Elite fullscreen control.
- Dedicated support utility.
- Simple execution.

Before Adding Android 17 Ask:

- Does my team reward momentum?
 - Can I capitalize on stolen turns?
 - Am I comfortable with technical pressure?
-

Summary

Why Pick Android 17?

- Unique barrier mechanics.
- Excellent pressure.
- Strong momentum generation.

Why Avoid Android 17?

- Team wants simplicity.
- Team needs stronger neutral control.

Final Verdict

- A momentum specialist capable of stealing control of the match through unique defensive mechanics and relentless offensive pressure.

BROLY (DBS)

Character Identity

Primary Roles

- Juggernaut
- Grappler
- Anchor

Team Archetypes

- Grappler
- Damage
- Snowball
- Comeback

One-Sentence Summary

- A terrifying grappler powerhouse that overwhelms opponents through massive damage, command grabs, and unstoppable offensive momentum.

What This Character Contributes

Damage

- Elite.
- Among the highest damage outputs in DBFZ.
- Turns successful reads into devastating reward.

Neutral

- Good.
- Large buttons.
- Strong screen presence.
- Wants to force close-range interactions.

Mix

- Exceptional.
- Strike/throw pressure.
- Constant command-grab threat.

Support

- Good assists.
- Useful pressure support.
- Strong combo utility.

Resource Economy

- Excellent.
- Converts meter into absurd damage.
- One of the strongest cashout characters in the game.

Team Placement

Point

- Viable: Good

Why

- Uses assists well.
- Can establish offensive momentum.

Mid

- Viable: Excellent

Why

- Enters with resources available.
- Gains access to stronger conversions.

Anchor

- Viable: Excellent

Why

- Limit Break.
- Command grabs.
- Incredible comeback potential.

Preferred Position

- Mid / Anchor

Explanation

- DBS Broly becomes increasingly threatening as resources accumulate and teams lose defensive options.

Assist Analysis

A Assist

Provides

- Pressure support.
- Combo utility.
- Offensive value.

B Assist

Provides

- Neutral utility.
- Space control.

C Assist

Provides

- Easy confirms.
- Long-range conversions.

DHC Synergy

Characters That Love DHCing Into DBS Broly

Why

- Converts momentum into enormous damage.

Characters DBS Broly Loves DHCing Into

Why

- Maximizes kill potential after successful reads.
-

Special DHC Interactions

Command Grab Threat

- Defines many offensive sequences.
- Forces opponents into difficult defensive choices.

Massive Cashout

- One of the best damage converters in the game.
-

Best Team Archetypes

Battery → Juggernaut

Why It Works

- Team generates resources.
- Broly spends them.

Example Teams

- Base Vegeta / DBS Broly / Tien
 - Krillin / DBS Broly / Janemba
-

Control → Kill

Why It Works

- Neutral specialists create openings.
- Broly ensures those openings matter.

Example Teams

- Frieza / DBS Broly / Tien
 - Janemba / DBS Broly / Base Goku
-

Win Conditions

Primary Win Condition

- Force strike/throw situations.

Secondary Win Condition

- Convert reads into massive damage.

Late-Game Win Condition

- Leverage command grabs and limit break to steal games.
-

Team Building Questions

DBS Broly Wants Teammates Who...

- Generate meter.
- Create opportunities.
- Support grappler pressure.

DBS Broly Struggles To Provide...

- Elite mobility.
- Fast-paced neutral.
- Consistent resource generation.

Before Adding DBS Broly Ask:

- Can my team generate meter?
 - Can my team support strike/throw pressure?
 - Do I need stronger damage?
-

Summary

Why Pick DBS Broly?

- Massive damage.
- Incredible comeback factor.
- Elite strike/throw pressure.

Why Avoid DBS Broly?

- Team needs mobility.
- Team wants technical setups.

Final Verdict

- A juggernaut grappler capable of turning a single successful read into overwhelming momentum and devastating damage.

KEFLA

Character Identity

Primary Roles

- Aggressor
- Point
- Rushdown

Team Archetypes

- Rushdown
- Pressure
- Snowball
- Fundamentals

One-Sentence Summary

- A fast-paced rushdown character that overwhelms opponents through relentless offense, strong movement, and constant pressure.
-

What This Character Contributes

Damage

- Strong damage.
- Excellent corner carry.
- Consistent reward from offensive openings.

Neutral

- Excellent.
- Fast movement.
- Strong approach tools.
- Quickly converts neutral wins into offense.

Mix

- Strong.
- Effective high/low and pressure sequences.
- Constantly threatens offensive resets.

Support

- Strong assists.

- Good offensive utility.
- Supports aggressive teams well.

Resource Economy

- Efficient.
 - Builds meter naturally through offense.
 - Doesn't require large investments to function.
-

Team Placement

Point

- Viable: Excellent

Why

- Uses assists extremely well.
- Establishes momentum immediately.
- Maximizes offensive pressure.

Mid

- Viable: Excellent

Why

- Maintains offensive tempo.
- Strong support value.

Anchor

- Viable: Situational

Why

- Strong solo offense.
- Loses some pressure without assists.

Preferred Position

- Point

Explanation

- Kefla gains the most value when she can start the team's offense and dictate the pace of the match.
-

-

Characters Kefla Loves DHCing Into

Why

- Maximizes reward after successful offense.
-

Special DHC Interactions

Lariat Pressure

- Defines many of Kefla's neutral and pressure sequences.
- Forces opponents to constantly respect her approach.

Offensive Tempo

- One of the fastest momentum generators in the roster.
-

Best Team Archetypes

Rushdown → Cashout

Why It Works

- Kefla creates openings.
- Teammates secure kills.

Example Teams

- Kefla / DBS Broly / Tien
 - Kefla / Janemba / Base Goku
-

Snowball Core

Why It Works

- Every successful interaction creates another offensive opportunity.
- Opponents struggle to slow the match down.

Example Teams

- Kefla / Android 17 / Tien
 - Kefla / Kid Buu / Base Goku
-

Win Conditions

Primary Win Condition

- Maintain offensive pressure.

Secondary Win Condition

- Force repeated defensive situations.

Late-Game Win Condition

- Leverage strong offense and mobility to overwhelm opponents.
-

Team Building Questions

Kefla Wants Teammates Who...

- Reward offensive momentum.
- Appreciate strong assists.
- Capitalize on pressure.

Kefla Struggles To Provide...

- Heavy setup play.

- Dedicated support utility.
- Defensive value.

Before Adding Kefla Ask:

- Does my team benefit from faster pacing?
 - Can my team capitalize on offensive momentum?
 - Do I want a stronger point character?
-

Summary**Why Pick Kefla?**

- Excellent pressure.
- Strong movement.
- Consistent offense.

Why Avoid Kefla?

- Team wants slower control.
- Team needs stronger support tools.

Final Verdict

- An aggressive rushdown specialist that excels at dictating pace, creating pressure, and forcing opponents onto the defensive.

GOGETA SS4

Character Identity**Primary Roles**

- Boss Character
- Point
- Win Condition

Team Archetypes

Characters Gogeta Blue Loves DHCing Into

Why

- Maximizes kill sequences and resource efficiency.

Special DHC Interactions

Massive Damage Routes

- One of the defining aspects of the character.
- Successful openings frequently become character kills.

Offensive Momentum

- Gogeta excels at maintaining pressure after successful interactions.
-

Best Team Archetypes

Rushdown → Execution

Why It Works

- Gogeta creates openings.
- Gogeta also cashes them out.

Example Teams

- Gogeta Blue / Janemba / Base Goku
 - Gogeta Blue / Android 17 / Tien
-

Pressure → Kill

Why It Works

- Opponents are forced into defensive situations repeatedly.
- Every mistake becomes extremely expensive.

Example Teams

- Gogeta Blue / Kid Buu / Base Goku
 - Gogeta Blue / Adult Gohan / Janemba
-

Win Conditions

Primary Win Condition

- Land meaningful openings and convert them into massive reward.

Secondary Win Condition

- Maintain offensive momentum.

Late-Game Win Condition

- Leverage exceptional damage and pressure to end rounds quickly.
-

Team Building Questions

Gogeta Blue Wants Teammates Who...

- Support offense.
- Reward momentum.
- Create opportunities for pressure.

Gogeta Blue Struggles To Provide...

- Dedicated support utility.
- Passive value.
- Strong team-wide resources.

Before Adding Gogeta Blue Ask:

- Can my team support aggressive offense?
 - Do I benefit from higher damage?
 - Can I capitalize on momentum?
-

Summary

Why Pick Gogeta Blue?

- Incredible damage.
- Strong pressure.
- Excellent offensive momentum.

Why Avoid Gogeta Blue?

- Team needs support.
- Team needs stronger utility.

Final Verdict

- An execution-focused powerhouse that turns successful openings into devastating damage while maintaining relentless offensive pressure.

SUPER BABY 2

Character Identity

Primary Roles

- Parasite
- Control
- Anchor

Team Archetypes

- Control
- Resource-Based
- Neutral
- Adaptation

One-Sentence Summary

- A resource-stealing specialist that weaponizes opponent tools, dominates long-range interactions, and becomes increasingly dangerous as the match progresses.
-

What This Character Contributes

Damage

- Strong damage.
- Excellent conversions.
- High reward from successful neutral wins.

Neutral

- Elite.
- Controls huge portions of the screen.
- Forces opponents to navigate projectile-heavy situations.

Mix

- Functional.
- Relies more on neutral dominance and conditioning than layered offense.

Support

- Strong assists.
- Excellent neutral utility.
- Provides unique team-building flexibility.

Resource Economy

- Exceptional.

- Gains value from situations other characters cannot.
 - Thrives in long matches.
-

Team Placement

Point

- Viable: Good

Why

- Strong neutral.
- Can establish control early.

Mid

- Viable: Excellent

Why

- Supports teammates effectively.
- Maintains strong battlefield presence.

Anchor

- Viable: Excellent

Why

- Strong solo neutral.
- Exceptional comeback potential.
- Benefits heavily from Limit Break.

Preferred Position

- Anchor

Explanation

- Baby's ability to function independently and exploit opponent resources makes him one of the strongest late-game characters in DBFZ.
-

Assist Analysis

A Assist

Provides

- Neutral support.
- Space control.

- Combo utility.

B Assist

Provides

- Offensive utility.
- Team flexibility.

Resource Advantage

Why It Works

- Baby gains value from extended games.
- Opponents gradually lose control of the match.

Example Teams

- Baby / Adult Gohan / Tien
 - Baby / DBS Broly / Janemba
-

Win Conditions

Primary Win Condition

- Control space and force mistakes.

Secondary Win Condition

- Leverage stolen assists and unique resources.

Late-Game Win Condition

- Overwhelm opponents through superior neutral and adaptability.
-

Team Building Questions

Baby Wants Teammates Who...

- Appreciate strong neutral.
- Reward screen control.
- Benefit from long games.

Baby Struggles To Provide...

- Elite mix.
- Immediate rushdown.
- Fast-paced offense.

Before Adding Baby Ask:

- Does my team benefit from stronger neutral?

- Can I capitalize on stolen assists?
 - Do I value strong anchor play?
-

Summary

Why Pick Baby?

- Incredible neutral.
- Unique assist-steal mechanic.
- Excellent anchor value.

Why Avoid Baby?

- Team wants rushdown.
- Team needs stronger mix.

Final Verdict

- A parasite-style specialist that turns the opponent's resources into his own while dominating neutral through screen control and adaptability.

ANDROID 21 (LAB COAT)
